GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Fundamentals of new material technologies, PG_00053712		
Field of study	Mechanical Engineering, Mechanical Engineering		
Date of commencement of studies	October 2020	Academic year of realisation of subject	2022/2023
Education level	first-cycle studies	Subject group	
Mode of study	Full-time studies	Mode of delivery	at the university
Year of study	3	Language of instruction	English
Semester of study	6	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Dionizy Czekaj	
	Teachers	prof. dr hab. inż. Dionizy Czekaj	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	0.0	0.0	15.0	0.0	30

E-learning hours included: 0.0

Fundamentals of new material technologie, W, DaPE, sem.6, letni 21/22 (M:320411W0) - Nowy - Moodle ID: 27185
https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27185

Fundamentals of new material technologies,P, DPE, sem.6 letni 21/22 (M:320411W0) - Nowy - Moodle ID: 27184
https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27184

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	0.0	0.0	30

Subject objectives

To explain students some key issues in the field of Materials Science and Engineering

Learning outcomes

Course outcome	Subject outcome	Method of verification
K6_W12	The student has general knowledge in the field of intellectual property protection.	[SW1] Assessment of factual knowledge
K6_U10	The student is able to make a general selection of the material intended for use in the solution of a specific engineering project.	[SU2] Assessment of ability to analyse information
K6_U01	Student can find source information with the use of library catalogs - analog and digital. Student is able to critically analyze the usefulness of the obtained data for the implementation of a selected engineering problem.	[SU2] Assessment of ability to analyse information
K6_W03	The student has knowledge on structural materials as well as methods of investigation their properties	[SW1] Assessment of factual knowledge

Subject contents

1. Ceramics and glass.
2. Modern (advanced) ceramic materials;
3. Refractory materials.
4. Ceramic abrasives;
5. Glass and glass-ceramics.

Prerequisites and co-requisites

Assessment methods and criteria

Subject passing criteria	Passing threshold	Percentage of the final grade
Colloquium (written paper)	51.0%	50.0%
Project Report	100.0%	50.0%
