

## Subject card

Subject name and code	Fundamentals of new material technologies, PG_00053712						
Field of study	Mechanical Engineering, Mechanical Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			English		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Dionizy Czekaj					
	Teachers	prof. dr hab. inż. Dionizy Czekaj					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
	Address on the e-learning platform: <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=12452">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=12452</a>						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	0.0		0.0		30
Subject objectives	To explain students some key issues in the field of Materials Science and Engineering						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_W12	The student has general knowledge in the field of intellectual property protection.			[SW1] Assessment of factual knowledge		
	K6_U10	The student is able to make a general selection of the material intended for use in the solution of a specific engineering project.			[SU2] Assessment of ability to analyse information		
	K6_U01	Student can find source information with the use of library catalogs - analog and digital. Student is able to critically analyze the usefulness of the obtained data for the implementation of a selected engineering problem.			[SU2] Assessment of ability to analyse information		
	K6_W03	The student has knowledge on structural materials as well as methods of investigation their properties			[SW1] Assessment of factual knowledge		
Subject contents	1. Ceramics and glass. 2. Modern (advanced) ceramic materials; 3. Refractory materials. 4. Ceramic abrasives; 5. Glass and glass-ceramics.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Colloquium (written paper)	51.0%			50.0%		
	Project Report	100.0%			50.0%
