

## Subject card

	D T 10 1 D0 00055555								
Subject name and code	Passenger Transport System, PG_00058566								
Field of study	Transport and Logistics, Transport and Logistics								
Date of commencement of studies	October 2020		Academic year of realisation of subject			2022/2023			
Education level	first-cycle studies		Subject group						
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	3		Language of instruction			Polish			
Semester of study	5		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Zakład Projektowania Okrętu -> Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology								
Name and surname of lecturer (lecturers)	, ,		dr hab. inż. Jakub Montewka						
	Teachers		mgr inż. Izabela Szwoch						
		dr hab. inż. Jakub Montewka

of instruction	Number of study hours	15.0	0.0	0.0	30.0		0.0	45	
	E-learning hours inclu			i				1	
Learning activity and number of study hours	Learning activity	Participation in classes include plan		Participation in consultation hours		Self-study		SUM	
	Number of study hours	45		0.0		0.0		45	
Subject objectives	The aim of the course is to familiarize student with the functioning of the passenger system in sea transport. Student learns the most important issues related to transport needs in servicing passenger traffic, passenger ships, safety in passenger transport, current trends in passenger transport, Polish maritime tourism, yachting in Poland and legal principles (IMO, EU) regarding the technical conditions of passenger transport.								
Learning outcomes	Course outcome		Subject outcome			Method of verification			
	knowledge on design, construction and operation of means and systems of transport systems of transport systems of transport systems at sea. I knowledge of life and equipment of vessels, charact discusses the demarine and inlar vessels. The stuknowledge of int transportation system at sea. I knowledge of life and equipment of vessels, charact discusses the demarine and inlar vessels. The stuknowledge of int transportation system at sea. I knowledge of life and equipment of vessels.			acterizes and design and types of land passenger student has		[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects			
	its e range of and operation is of transport and operation is of transport and presents engineering tr problem within subject. The s functioning of		reates, describes, a selected ransportation system in the scope of the student discusses the the passenger em in Poland and in		[SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task				
Subject contents  Prerequisites	Transport needs in passenger traffic. Quality of services in passenger transport. Development of major shipping centers. History of marine tourism. Current trends in passenger transport. Passenger ships. Types and directions of sea trips. Development of "cruising" - cruise shipping. Main markets for cruising. Ferry shipping: features, types and forms of ferry transport. Yachting and yacht market. Coastal and inland navigation. Intelligent transport systems in passenger transport. Sea tourism. Principles and methods of organizing passenger transport. Legal principles (IMO, EU) concerning the technical conditions of passenger transport. Safety rules for passenger transport. Principles and methods of passenger ship management. Security in the Baltic Sea region.  Knowledge of the subjects Sea ships, Infrastructure and operations in seaports								
and co-requisites		, , , , , , , , , , , , , , , , , , ,	, aca doldin		001	- F 2. W
