

## Subject card

|   |   |  |  |                                     |   |            |     |
|---|---|--|--|-------------------------------------|---|------------|-----|
| Subject name and code                       | PRAGMATIC LOGIC FOR ENGINEERS, PG_00044760  |  |  |                                     |   |            |     |
| Field of study                              | Engineering Management  |  |  |                                     |   |            |     |
| Date of commencement of studies             | October 2022  |  | Academic year of realisation of subject  |                                     | 2022/2023   |            |     |
| Education level                             | first-cycle studies   |  | Subject group  |                                     | Obligatory subject group in the field of study<br>Humanistic-social subject group |            |     |
| Mode of study                               | Part-time studies   |  | Mode of delivery   |                                     | at the university   |            |     |
| Year of study                               | 1   |  | Language of instruction  |                                     | Polish  |            |     |
| Semester of study                           | 1   |  | ECTS credits   |                                     | 3.0   |            |     |
| Learning profile                            | general academic profile  |  | Assessment form  |                                     | assessment  |            |     |
| Conducting unit                             | Department of Social Sciences and Philosophy -> Faculty of Management and Economics   |  |  |                                     |   |            |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor  |  | dr hab. Andrzej Lisak  |                                     |   |            |     |
|   | Teachers  |  | dr hab. Andrzej Lisak  |                                     |   |            |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial   | Laboratory                          | Project   | Seminar    | SUM |
|   | Number of study hours   | 16.0   | 8.0  | 0.0                                 | 0.0   | 0.0        | 24  |
|   | E-learning hours included: 0.0  |  |  |                                     |   |            |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan |  | Participation in consultation hours |   | Self-study | SUM |
|   | Number of study hours   | 24   |  | 6.0                                 |   | 45.0       | 75  |
| Subject objectives                          | The goal of the classes is to cultivate student's methodological self-awareness, their ability to reason and carry out proper thinking operations (inference, classification) and to practice the ability to recognize common logical fallacies in reasoning. |  |  |                                     |   |            |     |
| Learning outcomes                           | Course outcome  |  | Subject outcome  |                                     | Method of verification  |            |     |
|   | [K6_U06] uses basic theoretical knowledge to solve selected organizational problems, design technical solutions and manage projects, including engineering projects   |  | Student is aware of the limits of the application of logical tools in methodical problem-solving and understands the role of rhetoric in the construction of convincing arguments. |                                     | [SU1] Assessment of task fulfilment   |            |     |
|   | [K6_U07] can work independently and in a team   |  | Learns how to evaluate the logical correctness of a given scientific hypothesis.   |                                     | [SU2] Assessment of ability to analyse information                                |            |     |
|   | [K6_W06] has a basic knowledge of methods and tools for conducting research and analyses related to particular areas of the enterprise's operations and its environment   |  | Learns the basic logical inference and deduction.  |                                     | [SW1] Assessment of factual knowledge   |            |     |

|                                 |  |   |                               |
|---------------------------------|--|---|-------------------------------|
| Subject contents                | <p>1. Basic information on semiotics. Language as a system of signs. Syntactic categories. The semiotic function of expressions.</p> <p>2. Names and concepts. Logical division and classification.</p> <p>3. Definitions.</p> <p>4. Sentence and proposition.</p> <p>5. Logical fallacies and sources of misunderstandings.</p> <p>6. Idea of formal logic. Propositional calculus. Logical tautologies.</p> <p>7. Functional calculus.</p> <p>8. Syllogisms.</p> <p>9. Basic notions of relation theory.</p> <p>10. Direct and indirect reasoning. Drawing conclusions.</p> <p>11. Types of inference. Deductive inference and probabilistic inference.</p> <p>12. Role of inference in description and explanation of the world.</p> <p>13. Logical structure of science.</p> <p>14. Conversational logic and an art of argumentation.</p> <p>15. Limits of the application of logical instruments in reasoning. Art of rhetoric.</p> |   |                               |
| Prerequisites and co-requisites |  |   |                               |
| Assessment methods and criteria | Subject passing criteria   | Passing threshold   | Percentage of the final grade |
|                                 | Assignments  | 50.0%   | 15.0%                         |
|                                 | Active participation   | 50.0%   | 15.0%                         |
|                                 | Oral exam  | 50.0%   | 70.0%                         |
