

Subject card

Subject name and code	CAD - Computer Aided Design, PG_00044430						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. arch. Karolina Krause-Brykalska				
	Teachers		dr inż. arch. Karolina Krause-Brykalska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	16.0	0.0	0.0	16
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	16		5.0		54.0	75
Subject objectives	To familiarize the students with the basics of design using specialized CAD software. To transfer the knowledge in the field of computer-aided design and the practical use of selected CAD programs.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U06] uses basic theoretical knowledge to solve selected organizational problems, design technical solutions and manage projects, including engineering projects		The student is able to perform technical documentation using the CAD/CAM/CAE software; is able to properly format the prints, visualisations and data sheets; can transfer data between different platforms (CAD/CAM/CAE software, office software).		[SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	[K6_W05] knows the statistical and IT methods and tools that enable the acquisition and presentation of data on the organisation's resources, including technical resources		The student understands the specific of computer-aided design process; knows the rules and standards for creating technical documentation using CAD/CAM/CAE software.		[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge		
Subject contents	Introduction. Fusion 360 user interface. Modelling of simple solids. Sketching. The use of SCULPT space. Modification of models and creation of components. Design project management. Assembly of components. Rendering and creating drawing documentation. CAM and animations.						
Prerequisites and co-requisites	Basic knowledge of engineering drawing, knowledge of computer operating systems.						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Practical exercises		60.0%		40.0%		
	Midterm colloquium		60.0%		60.0%		

Recommended reading	Basic literature	1. Exercises shared by the instructors. 2. Software producer's training materials available online.
	Supplementary literature	1. Any literature on the design with Fusion 360.
	eResources addresses	Adresy na platformie eNauczanie: Komputerowe wspomaganie projektowania (ZI, niestacjonarne 2022/2023) - Moodle ID: 24366 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=24366
Example issues/ example questions/ tasks being completed	<ul style="list-style-type: none"> Using 3D modelling, follow these steps: <ol style="list-style-type: none"> create a cuboid with a base of a square with a geometric centre at the beginning of the coordinate system, with a side of 98 mm and a height of 37 mm set a cylinder with a diameter of 63 mm and a height of 31 mm on the rectangular prism using the SHELL command, convert the solid into a shell with a wall thickness of 5 mm cut the shell in half using the YZ plane create components from both halves and spread them apart Complete the model of the crank system based on the attached design documentation including the assembly drawing and executive drawings of individual components. 	
Work placement	Not applicable
