

Subject card

Subject name and code	Management of IT Resources in the Enterprise, PG_00044763						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies (on-line)		Mode of delivery		blended-learning		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Magdalena Ciesielska				
	Teachers		dr inż. Magdalena Ciesielska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	8.0	0.0	8.0	0.0	0.0	16
	E-learning hours included: 12.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	16		8.0		76.0	100
Subject objectives	The aim of the course is to acquire knowledge about IT resource management in modern enterprise. The student will acquire knowledge about modern technologies and its use in the enterprise as well as basic knowledge in the field of human resource management in IT, infrastructure management, IT service management and the legal implications of implementing new technology in the enterprise.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management		The student possesses a basic knowledge of IT asset management and information technologies necessary in the management of engineering.		[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U12] can design the process of exploitation of production and IT infrastructure with the use of appropriate methods, techniques and tools		The student is able to design the process of operating IT resources with using appropriate methods, techniques and tools.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	[K6_U09] obtains data for analysis and interpretation of results using information technology		The student knows how to obtain data for analyze IT resources in enterprise with using information technology IT.		[SU1] Assessment of task fulfilment		
Subject contents	Resource theory in business management. Information and information systems. IT assets: hardware, software, databases. Telecommunications and networks. IT services. Management of IT services. Strategic IT. IT risk.						
Prerequisites and co-requisites	none						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	60.0%	50.0%
	Lecture	60.0%	50.0%
