

Subject card

Subject name and code	Non-metallic materials, PG_00056242									
Field of study	Design and Construction of Yachts									
Date of commencement of studies	October 2022	Academic year of realisation of subject			2022/2023					
Education level	first-cycle studies	Subject group								
Mode of study	Full-time studies	Mode of delivery			at the university					
Year of study	1	Language of instruction			Polish					
Semester of study	1	ECTS credits			5.0					
Learning profile	practical profile	Assessment form			assessment					
Conducting unit	Department of Theory and Ship Design -> Faculty of Mechanical Engineering and Ship Technology									
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Lech Rowiński								
	Teachers	dr inż. Cezary Żrodowski mgr inż. Piotr Bela dr hab. inż. Lech Rowiński								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM			
	Number of study hours	15.0	0.0	30.0	15.0	0.0	60			
	E-learning hours included: 0.0									
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM				
	Number of study hours	60	12.0		53.0	125				
Subject objectives	Provide basic knowledge regarding organic synthetic materials (plastics) that are utilized in machine and boat building as well as principles of selection of materials for structures, glues and surface coats.									
Learning outcomes	Course outcome	Subject outcome			Method of verification					
	K6_W03	Is able to indicate influence of material parameters on hydrodynamic and mechanical properties of a boat components			[SW1] Assessment of factual knowledge					
	K6_U05	Is able to define process of selection of material for an element of boat structure			[SU2] Assessment of ability to analyse information					
Subject contents	Basic definitions and nomenclature (monomers and polymers); Review of non-metallic materials - natural and synthetic (cellulose, proteins, natural caoutchouc); Material characteristics for different application areas; Thermoplastics and elastomers. Mechanical and thermal properties of thermoplastics. Duromers and their chemistry. Resins and reinforcements for marine application. Technological process of reinforced structures. Technological process of a large structural element of reinforced synthetic resin.									
Prerequisites and co-requisites	Basic chemistry. Basic mechanical properties of materials									
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade					
	Short test during every lesson	60.0%			50.0%					
	Laboratory raport	80.0%			50.0%
