

## Subject card

Subject name and code	Operations research and numerical methods, PG_00044577						
Field of study	Transport						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	3	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Railway Engineering -> Faculty of Civil and Environmental Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Zbigniew Kędra					
	Teachers	dr inż. Michał Urbaniak dr inż. Karol Winkelmann mgr inż. Łukasz Jeliński dr inż. Zbigniew Kędra prof. dr hab. inż. Jarosław Górski					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	15.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	60	5.0		35.0		100
Subject objectives	The aim of the course is to familiarize students with the basic issues related to the subject of operations research and numerical methods						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U06] able to plan and conduct simple laboratory and operational experiments and simulations in the area of transport; able to interpret the results and formulate conclusions	The student is able to independently solve the tasks related to the optimization of transport problems. Is able to solve problems using the known numerical methods.			[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment		
	[K6_W01] has basic knowledge of mathematical analysis, algebra, calculus of probability and operational research required for describing and solving transport problems	The student has basic knowledge of operations research and numerical methods necessary to solve problems in transport			[SW1] Assessment of factual knowledge		
Subject contents	Introduction to operating researches. Building of decision model. Linear programming. Graphic method and simpleks. Dual task. Degeneracy of solutions. Forwarding question. Discreet optimization. Method of division and limitations. Basic notions and definitions of theory of vice - count. Network programming. Method CPM and PERT. The analysis in respect of time - cost. Interpolation and aproksymacja. Integration. Solving non - linear equations. Solving differential equations and arrangements of such equations.						
Prerequisites and co-requisites	Mathematics						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Lecture - exam	50.0%	10.0%
	Laboratory	50.0%	5.0%
	Exercise	50.0%	10.0%
	Laboratory	50.0%	20.0%
	Exercise	50.0%	25.0%
	Lecture - exam	50.0%	30.0%
