

Subject card

Subject name and code	METROLOGY, PG_00044540						
Field of study	Transport						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Electrical Engineering of Transport -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Sławomir Judek				
	Teachers		dr hab. inż. Jacek Skibicki				
			dr inż. Sławomir Judek				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		40.0	75
Subject objectives	Achievement by the student: • knowledge in the field of modern measuring methods, in particular with regard to the transport system; • skills engineering approach to the problem of metrology, and in particular the use of basic methods and procedures for the organization and operation of the measuring systems.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U06] able to plan and conduct simple laboratory and operational experiments and simulations in the area of transport; able to interpret the results and formulate conclusions		Student is able to perform the measurement procedure according to the instructions, develop results, prepare a report.		[SU2] Assessment of ability to analyse information		
	[K6_W14] has basic knowledge of measurement techniques used to describe the phenomena which occur in transport structures and when means of transport are operated		Student is able to use the acquired experience to solve measurement problems.		[SW1] Assessment of factual knowledge		
	[K6_U09] able to, when formulating and solving engineering problems in transport, use the right methods and devices to carry out measurements of basic values and parameters used in transport, carry out stress tests of structures, select the right materials, select elements of devices		Student defines the quantities and units. Makes the measurement of selected physical quantities of direct and indirect methods. Uses a conventional analog, digital instruments and oscilloscopes. Justifies the selection of the class, scope and type of instrument for measuring task. Estimated measurement uncertainty.		[SU4] Assessment of ability to use methods and tools		

Subject contents	LECTURE Quantity, unit, value, the system of units. Basic terms the theory of measurement uncertainty. Interval of uncertainty. General and specific procedures for estimating uncertainty. Measurement methods and tools. Signal processing and measurement transducers. Characteristic parameters. Standards. Analog measurements. Analog-digital converters. Digital measurements. Measurements of electrical quantities. Measurements of geometrical quantities, motion parameters, forces and stresses, pressure and flow, temperature, vibration, noise. Measurements using GPS technology and SRTM. Vision method 2D and 3D. LABORATORY Measurements: direct, indirect, single and multiple. Measurements of electrical quantities. Observations, imaging and oscilloscope measurements. Measurements of light intensity. Temperature measurements. Motion parameters measurements. Speed measurements. Checking the measuring equipment by comparison with the standard.		
Prerequisites and co-requisites	Basic knowledge on mathematics and physics.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Midterm colloquium.	60.0%	60.0%
	Reports of the laboratory experiments.	60.0%	40.0%

	eResources addresses	Adresy na platformie eNauczanie: Metrologia [2022/2023], stud. I stopnia, Transport, sem. 2 - Moodle ID: 29600 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=29600	
Example issues/ example questions/ tasks being completed	1. Determine the uncertainty in single, direct measurement with an analog instrument. 2. Determine the uncertainty in single, direct measurement with an digital instrument. 3. Determine the uncertainty in indirect single measurement. 4. Present the measurement result in accordance with applicable standards, including its uncertainty.		
Work placement	Not applicable
