

## Subject card

|   |   |  |  |            |  |                        |     |
|---|---|--|--|------------|--|------------------------|-----|
| Subject name and code                       | Real Estate Cadastre , PG_00044804  |  |  |            |  |                        |     |
| Field of study                              | Geodesy and Cartography   |  |  |            |  |                        |     |
| Date of commencement of studies             | October 2022  | Academic year of realisation of subject                  |  |            | 2023/2024  |                        |     |
| Education level                             | first-cycle studies   | Subject group  |  |            | Obligatory subject group in the field of study<br>Subject group related to scientific research in the field of study |                        |     |
| Mode of study                               | Full-time studies   | Mode of delivery   |  |            | at the university  |                        |     |
| Year of study                               | 2   | Language of instruction                                  |  |            | Polish   |                        |     |
| Semester of study                           | 3   | ECTS credits   |  |            | 7.0  |                        |     |
| Learning profile                            | general academic profile  | Assessment form  |  |            | assessment   |                        |     |
| Conducting unit                             | Department of Geodesy -> Faculty of Civil and Environmental Engineering   |  |  |            |  |                        |     |
| Name and surname of lecturer (lecturers)    | Subject supervisor  | dr inż. Paweł Wysocki                                    |  |            |  |                        |     |
|   | Teachers  | dr inż. Paweł Wysocki                                    |  |            |  |                        |     |
| Lesson types and methods of instruction     | Lesson type   | Lecture  | Tutorial   | Laboratory | Project  | Seminar                | SUM |
|   | Number of study hours   | 30.0   | 30.0   | 15.0       | 15.0   | 0.0                    | 90  |
|   | E-learning hours included: 0.0  |  |  |            |  |                        |     |
| Learning activity and number of study hours | Learning activity   | Participation in didactic classes included in study plan | Participation in consultation hours  |            | Self-study   |                        | SUM |
|   | Number of study hours   | 90   | 12.0   |            | 73.0   |                        | 175 |
| Subject objectives                          | Presentation of the rules for the collecting, storage and updating the cadastral data. Getting to know the legal acts connected with the land and building register in Poland.  |  |  |            |  |                        |     |
| Learning outcomes                           | Course outcome  |  | Subject outcome  |            |  | Method of verification |     |
|   | [K6_U10] can apply the current legal status in the field of standards, regulations and laws in the field of geodesy and selected regulations from related industries  |  | Student knows the legal acts regulating the functioning of the real estate cadastre in Poland.       |            |  |                        |     |
|   | [K6_U14] can apply the necessary skills to conduct independent work in the field of topographic surveys along with the elaborating of results, geodetic investment service, surveying and inventory measurement, photogrammetry and remote sensing, and making the maps and elaborations for legal purposes including delimitation and subdivision of real estate   |  | Student prepares the documentation of the demarcation and division of real estate.                   |            |  |                        |     |
|   | [K6_W08] has basic legal and geodetic knowledge and understands the concepts necessary to carry out tasks related to land and building registry, spatial planning and real estate management referring to the production of maps and elaborations for legal purposes including delimitation and subdivision as well as preparation and circulation of geodetic documents in the process of carrying out investments |  | Student edits the decision approving the division of real estate and boundary recognition agreement. |            |  |                        |     |

|  |  |   |                               |
|--|--|---|-------------------------------|
| Subject contents   | Definition of the property. The rights associated with the property. Perpetual book - the documentation of the legal status of the property. Farm. The legal bases for the construction of the Integrated Cadastral System. Land and buildings register - the authorities, the scope of the subjects and objects data, register units, register group. Systematics of arable land. The frame of the land and buildings register. The process of renovation and modernization of cadastral data sets. Integration and real estate divisions. Demarcation of the property. |   |                               |
| Prerequisites and co-requisites                                | No requirements  |   |                               |
| Assessment methods and criteria                                | Subject passing criteria   | Passing threshold   | Percentage of the final grade |
|  | Midterm colloquium   | 50.0%   | 80.0%                         |
|  | Practical exercise   | 100.0%  | 10.0%                         |
|  | Laboratory   | 100.0%  | 10.0%                         |
