

关。GDAŃSK UNIVERSITY 多 OF TECHNOLOGY

Subject card

Subject name and code	Concrete Structures, PG_00042506								
Field of study	Environmental Engineering								
Date of commencement of studies	October 2022		Academic year of realisation of subject			2022/2023			
Education level	second-cycle studies		Subject group			Optior	Optional subject group		
Mode of study	Part-time studies		Mode of delivery			e-learning			
Year of study	1		Language of instruction			Polish			
Semester of study	2		ECTS credits			3.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	с ,		-> Faculty of Civil and Environmental			Engineering			
Name and surname	Subject supervisor	dr hab. inż. Andrzej Ambroziak							
of lecturer (lecturers)	Teachers								
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	ect Seminar		SUM	
	Number of study hours	10.0	10.0	0.0	0.0		0.0	20	
	E-learning hours included: 20.0								
Learning activity and number of study hours	Learning activity	Participation in classes includ plan		Participation in consultation h			udy	SUM	
	Number of study hours	20	3.0			55.0		78	
Subject objectives	The aim of teaching the subject is to familiarize students with the essence of construction work concrete and reinforced concrete, mastering the methods of calculating and basic dimensioning elements of simple engineering structures.								
Learning outcomes	Course outcome								
Lourning outcomes	Course out	come	Subj	ect outcome			Method of ver	rification	
	Course out [K7_U01] can obtain from literature, datab other sources; can ir obtained information critically evaluate the conclusions, and forr comprehesively justii	information ases and itegrate the , interpret and em, draw mulate and	The student is use the inform of basic element	ect outcome able to obtain nation on the de ents of concrete ncrete structure	esign e and	[SU2] A analyse [SU3] A use kno subject [SU4] A	Assessment o e information Assessment o owledge gain	f ability to f ability to ed from the f ability to

Example issues/ example questions/ tasks being completed	1. Provide the name and surname of the person considered to be the inventor of reinforced concrete in modern times and the date the invention was patented.2. Give the name and surname of the person believed to have used prestressed elements in modern times.3. Give the division according to the use of concrete in construction elements.4. List the differences between prestressed concrete and post-tensioned concrete.5. What do you understand by: concrete?6. The PN-EN 206 + A1: 2016-12 standard "Concrete - Requirements, properties, production and compliance" applies to concrete used for. ?7. List the basic mechanical properties of concrete?8. The compressive strength of concrete under biaxial and uniform compression is lower or higher (if percentage) than for uniaxial compression.9. What are the standard (according to PN-EN 206 + A1: 2016-12) dimensions and shapes of samples for testing concrete compressive strength?
