| Subject objectives                          | The use of knowledge and skills to solve problems in enterprises and the assessment of phenomena occurring in their context and macroeconomics.   |  |          |                                     |  |            |     |
| Learning outcomes                           | Course outcome  | Subject outcome  |          |                                     | Method of verification   |            |     |
|   | [K6_U13] can improve oneself through the systematic acquisition of knowledge and skills   | Perfects their knowledge and skills through project works.   |          |                                     | [SK2] Assessment of progress of work   |            |     |
|   | [K6_U07] can work independently and in a team   | He can organize a team for the task, makes the division of labor.  |          |                                     | [SU4] Assessment of ability to use methods and tools<br>[SU3] Assessment of ability to use knowledge gained from the subject |            |     |
|   | [K6_U06] uses basic theoretical knowledge to solve selected organizational problems, design technical solutions and manage projects, including engineering projects   |  |          |                                     |  |            |     |
|   | [K6_K02] identifies problems related to undertaking various tasks, including engineering in the changing conditions of the organisation's functioning; takes into account the ethical aspect related to the implementation of the organisation's tasks              | The student identifies and takes into account the ethical problems related to undertaking engineering tasks in a changing environment. |          |                                     | [SK5] Assessment of ability to solve problems that arise in practice   |            |     |
|   | [K6_K01] can define priorities related to the implementation of team tasks as well as individual tasks  | Prioritizes the team and individual projects.  |          |                                     | [SK3] Assessment of ability to organize work   |            |     |
| Subject contents                            | Understanding the organizational structure of the enterprise or institution.<br><br>Getting to know the tools and manufacturing systems engineering techniques used in the enterprise. Participation in the creation and implementation of the project engineering. |  |          |                                     |  |            |     |

|  |  |  |                               |
