

Subject card

Subject name and code	Management of IT Resources in the Enterprise, PG_00044764						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	3		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Magdalena Ciesielska				
	Teachers		dr inż. Magdalena Ciesielska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		8.0		62.0	100
Subject objectives	The objective of this course is to gain knowledge on Information Technology resource management. Student will gain knowledge on emerging technologies, their application in business, as well as fundamental knowledge on human resource management in IT sector, infrastructure management, IT service management, IT asset management and legal implication of emerging technology implementation.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management				[SW2] Assessment of knowledge contained in presentation [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U12] can design the process of exploitation of production and IT infrastructure with the use of appropriate methods, techniques and tools				[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task [SU2] Assessment of ability to analyse information		
	[K6_U09] obtains data for analysis and interpretation of results using information technology				[SU1] Assessment of task fulfilment		
Subject contents	The concept of the Resource-Based View. Definition of IT Resources and Life Cycle. IT strategy. Emerging Technologies in business. IT-Business Alignment. Information Systems. ITSM. IT Audit. ITAM. IT Human Resource Management. IT architecture Frameworks. IT Project Management. IT Risk Management. IT Outsourcing. Legal and economic aspect of IT contracts.						
Prerequisites and co-requisites	none						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
			60.0%		50.0%		
			60.0%		50.0%
