

Subject card

Subject name and code	Production Engineering, PG_00044280						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Jolanta Łopatowska				
	Teachers		dr inż. Jolanta Łopatowska				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		32.0	100
Subject objectives	The aim of the course is to understand the essence of planning and control at every level of operations activity and the acquisition of skills to ensure effective realization of production process.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management		Knows the activities carried out in the production planning and control process and solutions supporting them.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_W10] has the knowledge of the life cycle of the production system and the product		Identifies the components of the production system. Decomposes production system.		[SW3] Assessment of knowledge contained in written work and projects		
	[K6_U11] can plan and control production and production quality, including the identification and formulation of specifications for simple engineering tasks		Uses the main methods of production planning and control.		[SU4] Assessment of ability to use methods and tools		
Subject contents	Production system and production process. Production system and production process. Actions in production planning and control. Forecasting in demand planning. Production capacity planning. Sales and Operations Planning S&OP. The Master Production Scheduling. Tasks scheduling. Push and pull conceptions. Planning and control in MRP/ERP, APS, MES systems. Production balancing in JiT systems (OPF), heijunka. kanban., supermarket, CONWIP system. Production control according to the Theory of Constraints, DBR method.						
Prerequisites and co-requisites	production management						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	reports	60.0%	25.0%
	exam	60.0%	50.0%
	colloquim	60.0%	25.0%
