

Subject card

Subject name and code	Production Engineering, PG_00044280						
Field of study	Engineering Management						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Industrial Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Jolanta Łopatowska					
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	30.0	0.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	60	8.0	32.0	100		
Subject objectives	The aim of the course is to understand the essence of planning and control at every level of operations activity and the acquisition of skills to ensure effective realization of production process.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U11] can plan and control production and production quality, including the identification and formulation of specifications for simple engineering tasks	Uses the main methods of production planning and control.			[SU4] Assessment of ability to use methods and tools		
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management	Knows the activities carried out in the production planning and control process and solutions supporting them.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	[K6_W10] has the knowledge of the life cycle of the production system and the product	Identifies the components of the production system. Decomposes production system.			[SW3] Assessment of knowledge contained in written work and projects		
	Production system and production process. Decomposition of the production system. Parameters of the production process. Actions in production planning and control. Forecasting in demand planning. Production capacity planning. Strategies of capacity and demand adapting. Sales and Operations Planning S&OP. The Master Production Scheduling. Rough-cut capacity planning. Tasks scheduling. Planning and control synchronization in supply chain. Push and pull conceptions. Planning and control in MRP systems. Planning and control in MRPII/ERP, APS, MES systems. Production balancing and leveling in JiT systems, heijunka. Elements in kanban cycle, supermarket. CONWIP and POLCA systems. Production control according to the Theory of Constraints. Classical methods of production control. Production planning in CIM systems. Production planning in IMS systems.						
	Prerequisites and co-requisites						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Written exam		60.0%		50.0%		
	Reports		50.0%		25.0%		
	Midterm colloquia		60.0%		25.0%
