

Subject card

Subject name and code	Labour Process Organization, PG_00040574						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Jerzy Grabosz				
	Teachers		mgr inż. Jerzy Grabosz				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		6.0		49.0	100
Subject objectives	Mastering the skills of analyzing, modeling and sumulating work processes using IT software						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W02] has a basic knowledge of the different types of departments in the organisation, with particular emphasis on structures of an engineering nature		It has a basic knowledge of engineering analyzing, organizing, and improving the structure of work processes.		[SW1] Assessment of factual knowledge		
	[K6_W12] has a basic knowledge of production management and occupational safety and ergonomics management, as well as information technologies necessary for engineering management		It has a basic knowledge of management, evaluation and categorization of work processes.		[SW1] Assessment of factual knowledge		
	[K6_W13] has a basic knowledge of the design, modelling and optimisation of technical processes and systems		It has a basic knowledge of mathematics, physics and chemistry, which is essential for proper solving technical problems.		[SW1] Assessment of factual knowledge		
	[K6_U08] analyses engineering and managerial solutions in decision-making processes, taking into account pro-quality and pro-environmental aspects, as well as safety of work processes		Uses assessment methods, modeling and simulation work using computer software company BOC Adonis and Profit.		[SU3] Assessment of ability to use knowledge gained from the subject		
	[K6_U07] can work independently and in a team		Uses assessment methods, modeling and work using computer software		[SU1] Assessment of task fulfilment		

Subject contents	Lecture Assessment and analysis of the organization of work processes.; Systems of man-oriented works.; The study and improvement of work processes.; Standardization of time work processes.; Assessment and analysis of the human work load.; Suitability of operators to perform the work.; Concepts of extended work.; The organization of shift work.; Organization of loading work monotony.; Evaluation and qualification of work processes.; Selection and optimization of resources in the systems of work.; Evaluation of information links and information security.; Shaping the spatial structure of work.; Design and standardization of processes across the organization.; Standardization of work processes. Laboratory Identification, notations and mapping of processes in Visio.; Modeling the allocation of activities and roles in the processes in ADONIS.; Evaluation of functionality of systems by work methods 5S 5M in EXCEL.; Techniques ETA and FTA of study of work processes in VISIO.; Technology mapping of work processes in EXCEL.; Timing and snapshot observations in EXCEL.; Standardization of MTM technique norms in the program STATISTICA.; Analysis and simulation of the load process, in the program ADONIS.; Hazard identification and assessment of biomechanical loads.; Psychometric methodology standardization.; Technology of shift work organization; Methods of assessing and reducing of monotonous work. Work requirements and assessment of the suitability of the operator.; Methods for evaluation and qualification of work.; Optimization of work processes and resources in the program SOLVER.																	
Prerequisites and co-requisites	Management Foundations of Computer Science Fundamentals of statistics																	
Assessment methods and criteria	<table><tr><th>Subject passing criteria</th><th>Passing threshold</th><th>Percentage of the final grade</th></tr><tr><td>Oral exam</td><td>60.0%</td><td>15.0%</td></tr><tr><td>Written exam</td><td>60.0%</td><td>20.0%</td></tr><tr><td>Midterm colloquium</td><td>60.0%</td><td>30.0%</td></tr><tr><td>Laboratory Reports</td><td>100.0%</td><td>35.0%</td></tr></table>			Subject passing criteria	Passing threshold	Percentage of the final grade	Oral exam	60.0%	15.0%	Written exam	60.0%	20.0%	Midterm colloquium	60.0%	30.0%	Laboratory Reports	100.0%	35.0%
Subject passing criteria	Passing threshold	Percentage of the final grade																
Oral exam	60.0%	15.0%																
Written exam	60.0%	20.0%																
Midterm colloquium	60.0%	30.0%																
Laboratory Reports	100.0%	35.0%
