

Subject card

Subject name and code	PRAGMATIC LOGIC FOR ENGINEERS, PG_00044759						
Field of study	Engineering Management						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Social Sciences and Philosophy -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. Andrzej Lisak				
	Teachers		dr hab. Andrzej Lisak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	15.0	0.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		6.0		24.0	75
Subject objectives	The goal of the classes is to cultivate student's methodological self-awareness, their ability to reason and carry out proper thinking operations (inference, classification) and to practice the ability to recognize common logical fallacies in reasoning.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W06] has a basic knowledge of methods and tools for conducting research and analyses related to particular areas of the enterprise's operations and its environment		Learns the basic logical inference and deduction.		[SW1] Assessment of factual knowledge		
	[K6_U07] can work independently and in a team		Learns how to evaluate the logical correctness of a given scientific hypothesis.		[SU2] Assessment of ability to analyse information		
	[K6_U06] uses basic theoretical knowledge to solve selected organizational problems, design technical solutions and manage projects, including engineering projects		Student is aware of the limits of the application of logical tools in methodical problem-solving and understands the role of rhetoric in the construction of convincing arguments.		[SU1] Assessment of task fulfilment		

Subject contents	<p>1. Basic information on semiotics. Language as a system of signs. Syntactic categories. The semiotic function of expressions.</p> <p>2. Names and concepts. Logical division and classification.</p> <p>3. Definitions.</p> <p>4. Sentence and proposition.</p> <p>5. Logical fallacies and sources of misunderstandings.</p> <p>6. Idea of formal logic. Propositional calculus. Logical tautologies.</p> <p>7. Functional calculus.</p> <p>8. Syllogisms.</p> <p>9. Basic notions of relation theory.</p> <p>10. Direct and indirect reasoning. Drawing conclusions.</p> <p>11. Types of inference. Deductive inference and probabilistic inference.</p> <p>12. Role of inference in description and explanation of the world.</p> <p>13. Logical structure of science.</p> <p>14. Conversational logic and an art of argumentation.</p> <p>15. Limits of the application of logical instruments in reasoning. Art of rhetoric.</p>		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Assignments	50.0%	15.0%
	Active participation	50.0%	15.0%
	Oral exam	50.0%	70.0%
Recommended reading	Basic literature	T. Hołówka, Kultura logiczna w przykładach, PWN Warszawa 2005.	
	Supplementary literature	<p>K. Szymanek, Sztuka argumentacji. Słownik terminologiczny, PWN Warszawa 2001.</p> <p>R. Wójcicki, Wykłady z logiki z elementami teorii wiedzy, Scholar Warszawa 2003.</p>	
	eResources addresses	<p>Adresy na platformie eNauczanie:</p> <p>Logika pragmatyczna dla inżynierów STAC 2022/2023 - Moodle ID: 27107</p> <p>https://enauczanie.pg.edu.pl/moodle/course/view.php?id=27107</p>	

Example issues/ example questions/ tasks being completed	<p>What is logical inference.</p> <p>Check if the given fomula is tautology belongs to the classical logical calculus.</p> <p>What is logical division.</p> <p>What are syllogisms?</p>
Work placement	Not applicable
