GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Standardization and quality assessment, PG_00039627		
Field of study	Materials Engineering, Materials Engineering, Materials Engineering		
Date of commencement of studies	February 2023	Academic year of realisation of subject	2023/2024
Education level	second-cycle studies	Subject group	Obligatory subject group in the field of study Subject group related to scientific research in the field of study
Mode of study	Full-time studies	Mode of delivery	blended-learning
Year of study	1	Language of instruction	Polish
Semester of study	2	ECTS credits	2.0
Learning profile	general academic profile	Assessment form	assessment
Conducting unit	Zakład Technologii Materiałów Konstrukcyjnych i Spajania -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology		
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Jerzy Łabanowski	
	Teachers	dr inż. Jacek Haras prof. dr hab. inż. Jerzy Łabanowski	

Lesson types and methods of instruction

Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
Number of study hours	15.0	15.0	0.0	0.0	0.0	30

E-learning hours included: 15.0

Normalizacja i ocena jakości, W, Inż. Mater., sem 2 zimowy23/24, PG_00039627 - Moodle ID: 31063 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=31063

Learning activity and number of study hours

Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM
Number of study hours	30	5.0	15.0	50

Subject objectives

To acquaint students with the principles of normalization and classification of construction materials included in the standards and technical industry regulations.

Learning outcomes

Course outcome	Subject outcome	Method of verification
K7_W05	Recognizes the indication of steel and non-ferrous alloys. Presents the terminology of metal products and semi-finished	[SW1] Assessment of factual knowledge
K7_U01	The student knows the rules of presenting the results of control tests of metalic materials	[SU3] Assessment of ability to use knowledge gained from the subject
K7_K01	The student is able to evaluate the content and prepare documents regarding the quality of metal products and semi-finished products. He can plan and carry out control tests of steel products	[SK5] Assessment of ability to solve problems that arise in practice

Subject contents

LECTURE Classfication of steel, cast steel, cast iron, non-ferrous metals and their alloys, division into classes and categories. Rules for marking grades of ferrous and non-ferrous metal alloys according to Polish and European standards, ISO and American AISI, UNS. Semi-finished and metallurgical products - terminology, forms and classification states, stamping, packing, transport. Steel products and metallurgical products of non-ferrous metals - rolled products, forgings, drawn and extruded products, castings, metal powders and sintered products metal powders. Unification and standardization of marking of steel products. Review of groups and requirements for metal materials used in various branches of the economy: materials for the energy sector conventional and nuclear, materials for marine structures, materials for the automotive industry and aviation, materials for the chemical and petrochemical industries, materials for construction. Recipes specifying acceptance requirements for steel products (standards, regulations of Ship Companies Classification regulations, UDT regulations). Principles of selecting substitutes for steel and non-ferrous metal alloys.TUTORIALS Practical use of regulations and standards specifying requirements for products metallurgical. Determining the acceptance requirements for rolled, forged, drawn, and steel products steel castings. Setting criteria and selecting materials for specific industrial applications automotive, aviation, petrochemical, shipbuilding in nuclear and conventional energy and construction. Selection of substitutes for steel, cast steel and cast iron according to Polish and foreign standards - exercise in using a computer database. .

Prerequisites and co-requisites		
Assessment methods and criteria		

Subject passing criteria	Passing threshold	Percentage of the final grade
sprawozdania	50.0%	40.0%
kol. zaliczeniowe	50.0%	60.0%
