

Subject card

Subject name and code	Polymeric Biomaterials, PG_00039684						
Field of study	Materials Engineering, Materials Engineering, Materials Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject				2023/2024	
Education level	second-cycle studies	Subject group				Optional subject group Subject group related to scientific research in the field of study	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	1	Language of instruction				Polish	
Semester of study	2	ECTS credits				2.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Department of Polymers Technology -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Justyna Kucińska-Lipka				
	Teachers		dr hab. inż. Justyna Kucińska-Lipka				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		5.0		15.0	50
Subject objectives	The aim of the course is to familiarize students with the types of polymeric biomaterials and their application.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K7_K02		The student knows what is biocompatibility, how to study it and what is important in the design of materials for medicine		[SK1] Assessment of group work skills [SK5] Assessment of ability to solve problems that arise in practice		
	K7_U06		The student knows the methods of producing materials for use in medicine, e.g. regenerative		[SU5] Assessment of ability to present the results of task		
	K7_W01		The student knows what polymeric biomaterials are and knows their division and importance in medicine		[SW1] Assessment of factual knowledge		
Subject contents	<p>Classification of polymeric biomaterials based on their origin, Classification of polymer materials due to their use The use of polymeric biomaterials in dentistry Application of polymeric biomaterials in regenerative medicine Application of polymeric biomaterials in cardiac surgery The use of polymeric biomaterials in orthopedics</p>						
Prerequisites and co-requisites	Basic knowledge of polymer chemistry,						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	laboratory		60.0%		40.0%		
	passing the lecture		60.0%		60.0%		
Recommended reading	Basic literature		Maria Cristina Tanzi Silvia Farè" Characterization of Polymeric Biomaterials" Elsevier 2017				

	Supplementary literature	Torbicz W. "Inżynieria biomedyczna" tom 4. Biomateriały PAN
	eResources addresses	
Example issues/ example questions/ tasks being completed	Designing a material that would support the regeneration of cartilage	
Work placement	Not applicable
