

Subject card

Subject name and code	Ship Production Technology 2, PG_00046533						
Field of study	Ocean Engineering, Ocean Engineering						
Date of commencement of studies	October 2020	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group					
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			6.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Ship Manufacturing Technology, Quality Systems and Materials Science -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Ryszard Pyszko				
	Teachers		dr inż. Mohamed Behilil dr inż. Ryszard Pyszko				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	20.0	0.0	10.0	20.0	0.0	50
	E-learning hours included: 0.0						
Address on the e-learning platform: https://enauczanie.pg.edu.pl/moodle/course/view.php?id=18265							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	50		7.0		93.0	150
Subject objectives	The aim of the course is to explain the basic processes taking place during the construction of a ship, in terms of the basic laws of physics, work organization, which leads to the ability to estimate the production efficiency of a shipyard.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W05] has an organized knowledge on design, construction and operation of ocean technology objects and systems		The student has knowledge of the conduct and organization of production processes in a shipyard		[SW1] Assessment of factual knowledge		
[K6_U05] can formulate a simple engineering task and its specification within the range of design, construction and operation of ocean technology objects and systems		The student is able to formulate the basic production processes and parameters describing the production efficiency		[SU3] Assessment of ability to use knowledge gained from the subject			
Subject contents	<ol style="list-style-type: none"> 1. Reminder of the information from the subject of the previous semester 2. Characteristics of the pre-treatment process 3. Characteristics of the machining process 4. Prefabrication of lobe panels 5. Prefabrication of micropanels 6. Prefabrication of curvilinear lobe panels 7. Prefabrication of spatial panels and equipment 8. Block prefabrication and equipment 9. Painting and maintenance line 10. Hull assembly on launching rig 11. Launching and driving equipment 12. Trials of the ship 13. On the ship 14. Guarantee of the yard 						

Prerequisites and co-requisites	Courses taught in previous years in the field: - Materials, - Welding, - Metal forming. Continuing the subject of the semester 6		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Reports from the lab	100.0%	10.0%
	The oral examination	60.0%	40.0%
	Project	100.0%	50.0%
Recommended reading	Basic literature	Literatura podstawowa: 1.Doerffer J.: Technologia budowy kadłubów okrętowych. WM Gdynia 1971. 2.Doerffer J.: Technologia wyposażania statków.
