

## Subject card

Subject name and code	Object-oriented Programming and Computer Graphics, PG_00047585						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		Polish		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Kajetan Kruczkowski				
	Teachers		dr inż. Marcin Pazio  mgr inż. Kajetan Kruczkowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		4.0		51.0	100
Subject objectives	The main aim of this subject is to introduce its participants an object oriented programming in Java language (including Java 3D API). Java classess and program development mechanisms are to prepare the students to create applications with computer graphics. The applications include 2D graphics, simple animations as well as 3D graphics (Java 3D API).						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U04] can apply knowledge of programming methods and techniques as well as select and apply appropriate programming methods and tools in computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study		Student is able to program computer graphics processing systems in object-oriented languages.		[SU5] Assessment of ability to present the results of task [SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K6_W04] knows and understands, to an advanced extent, the principles, methods and techniques of programming and the principles of computer software development or programming devices or controllers using microprocessors or programmable elements or systems specific to the field of study, and organisation of systems using computers or such devices		Student knows and understands the principles of object-oriented software preparation in applications related to computer graphics.		[SW1] Assessment of factual knowledge		
Subject contents	The content of the subject includes basics of object oriented programming, the structure of Java virtual machine, threads (with timer). Moreover it concerns drawing primitives, handling events (AWT calss). Further part presents Java 3D API, its specific structures, 3D primitives, material, textures, lighting. There are also classess to animate 3D graphic objects and detect dependencies between them.						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	project	50.0%	50.0%
	test	50.0%	50.0%
Recommended reading	Basic literature	Bruce Eckel, Thinking in Java. Edycja polska (Wydanie IV), Helion 2006  Java 3D API documentation, Oracle (www.oracle.com)	
	Supplementary literature	Java Programing, Wikibooks Edition	
	eResources addresses	Adresy na platformie eNauczanie: Programowanie obiektowe i grafika komputerowa 2024 - Moodle ID: 38748 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=38748">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=38748</a>	
Example issues/ example questions/ tasks being completed	Animation od a flying object based on timer ond keyboard events (2D graphics).  Creating 3D primitives with a given material and lighting.  Animation of 3D objects with colission detection.		
Work placement	Not applicable
