

Subject card

| Subject name and code | Analog Control - laboratory, PG_00047591 | | | | | | | | |
|---|--|--|---|-------------------------------------|--------|---|-------------|-----|--|
| Field of study | Automatic Control, Cybernetics and Robotics | | | | | | | | |
| Date of commencement of studies | October 2022 | | Academic year of realisation of subject | | | 2024/2025 | | | |
| Education level | first-cycle studies | | Subject group | | | Obligatory subject group in the field of study Subject group related to scientific research in the field of study | | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | | |
| Year of study | 3 | | Language of instruction | | | Polish | | | |
| Semester of study | 5 | | ECTS credits | | | 2.0 | | | |
| Learning profile | general academic profile | | Assessment form | | | assessment | | | |
| Conducting unit | Department of Autom | Faculty of Electronics, Telecommunications and Informatics | | | | | | | |
| Name and surname | Subject supervisor Teachers | | dr inż. Piotr Fiertek | | | | | | |
| of lecturer (lecturers) | | | dr inż. Piotr F | | | | | | |
| Lesson types and methods | Lesson type | Lecture | Tutorial | Laboratory | Projec | :t | Seminar | SUM | |
| of instruction | Number of study hours | 0.0 | 0.0 | 30.0 | 0.0 | | 0.0 | 30 | |
| | E-learning hours inclu | E-learning hours included: 0.0 | | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation in classes include plan | | Participation in consultation hours | | Self-study | | SUM | |
| | Number of study hours | 30 | | 2.0 | | 18.0 | | 50 | |
| Subject objectives | The aim of the course is to familiarize with the practical aspects of control theory | | | | | | | | |
| Learning outcomes | Course outcome Subject outcome Method of verification | | | | | | | | |
| | [K6_U05] can plan and conduct experiments related to the field of study, including computer simulations and measurements; interpret obtained results and draw conclusions [K6_U06] can analyse the operation of components, circuits and systems related to the field of study, measure their parameters and examine technical specifications [K6_U21] can individually carry out an analysis of a managing and controlling problem and is able to individually design, tune and | | student is able to simulate the operation of a closed control system built on linear and non-linear objects. On this basis, the student is able to conduct experiments related to the selection of the appropriate control algorithm. Student is able to determine the settings of proportional controller, PID controller, LEAD, LEAD-LAG and control system with state feedback. student is able to identify the parameters of models of identified objects and determine the technical characteristics of the control system components and the control object student knows the methods of stability tests and synthesis of control systems (linear and nonlinear), can | | | [SU1] Assessment of task fulfilment [SU1] Assessment of task fulfilment [SU1] Assessment of task fulfilment | | | |
| Subject contents | gulation and use and monitor ses, student ha | simulate the operation of the control system, can adjustment the PID controllers s to realize 7 of exercises | | | | | | | |
| Prerequisites | Necessary requirement for taking part in the laboratory classes is pass 'Basics of Automation' and 'Analog Control' courses. Before, the student should master the basics of control theory for linear and nonlinear systems. | | | | | | and 'Analog | | |
| and co-requisites | | | | | | | | | |
| Assessment methods | Subject passin | Pass | Passing threshold | | | Percentage of the final grade | | | |
| and criteria | job processing and reports | | 50.0% | | | 100.0% | | | |
