

Subject card

Subject name and code	Systems Modelling and Analysis, PG_00047715						
Field of study	Informatics						
Date of commencement of studies	October 2022		Academic year of realisation of subject			2022/2023	
Education level	second-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study	
Mode of study	Part-time studies		Mode of delivery			at the university	
Year of study	1		Language of instruction			Polish	
Semester of study	1		ECTS credits			6.0	
Learning profile	general academic profile		Assessment form			exam	
Conducting unit	Department of Software Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Anna Bobkowska				
	Teachers		dr inż. Anna Bobkowska mgr Krzysztof Wyrzykowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	12.0	0.0	12.0	12.0	0.0	36
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	36		10.0		104.0	150
Subject objectives	The goal of the course is to prepare students for performing jobs of system analyst and business analyst.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_U41] can select methods of modelling and analysis of information systems and applications using selected elements of theoretical computer science and modern programming tools	Student can select proper techniques and tools for software modeling and business analysis	[SU1] Assessment of task fulfilment
	[K7_U01] can apply mathematical knowledge to formulate and solve complex and non-typical problems related to the field of study by:n-appropriate selection of source information and its critical analysis, synthesis, creative interpretation and presentation,n-application of appropriate methods and toolsn	Student can select proper techniques and tools for software modeling and business analysis	[SU2] Assessment of ability to analyse information
	[K7_W42] Knows and understands, to an increased extent, the principles and trends in the analysis and design of local and distributed IT systems and the basics of computer modeling and computerization of complex cognitive and decision-making processes.	Student knows and understands areas of system analysis and business analysis as well as selected advanced approaches to software modeling.	[SW1] Assessment of factual knowledge
	[K7_U08] while identifying and formulating engineering tasks specifications and solving these tasks, can:n- apply analytical, simulation and experimental methods,n- notice their systemic and non-technical aspects,n-make a preliminary economic assessment of suggested solutions and engineering workn	Student can apply UML in systems modeling.	[SU1] Assessment of task fulfilment
Subject contents	<p>Introduction to modeling, UML Use case diagram Class diagram - elements and application of class diagrams in system analysis Dynamic models in UML Other structure diagrams Application of UML models in software engineering</p> <p>UML tools and their usability Application of analysis patterns Introduction to MDA/MDE Domain specific modeling Business modeling Selection of proper modeling methods Business analyst</p>		
Prerequisites and co-requisites	No requirements		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Lab	50.0%	33.0%
	Project	50.0%	17.0%
	Written exam	50.0%	50.0%
