

## Subject card

Subject name and code		Wireless Technology, PG_00047922						
Field of study		Electronics and Telecommunications						
Date of commencement of studies		October 2022	Academic year of realisation of subject			2023/2024		
Education level		first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study		Full-time studies	Mode of delivery			at the university		
Year of study		2	Language of instruction			Polish		
Semester of study		4	ECTS credits			3.0		
Learning profile		general academic profile	Assessment form			exam		
Conducting unit		Department of Radiocommunication Systems and Networks -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)		Subject supervisor		dr inż. Krzysztof Cwalina				
		Teachers		dr inż. Krzysztof Cwalina				
Lesson types and methods of instruction		Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
		Number of study hours	15.0	0.0	15.0	0.0	0.0	30
		E-learning hours included: 0.0						
Learning activity and number of study hours		Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
		Number of study hours	30	3.0		42.0		75
Subject objectives		Radio link structure and operation, typical applications						
Learning outcomes		Course outcome	Subject outcome			Method of verification		
		[K6_W34] Knows the characteristics of telecommunications channels, methods of securing information, modulation systems, methods of access to the channel.	The student learned the basics of the construction and operation of the radio link, the main operational conditions in this area, important from the point of view of designing wireless communication systems.			[SW3] Assessment of knowledge contained in written work and projects		
		[K6_U31] can identify telecommunications network architectures, differentiates their areas and functional elements, evaluates the quality of service delivery, calculates parameters of functional elements	The student learned the methods of analyzing systems and systems related to field of study			[SU4] Assessment of ability to use methods and tools		
Subject contents		1 Radio-link structure, transmitter and receiver parts, wireless part 2 Base phenomena's in wireless medium, radio communication equation 3 Antenna interface, base parameters 4 Transmitter technique principles, the transmitter technique 5 Receiver technique principles, the receiver technique 6 IF part of receiver 7 Transceive station 8 HF part of radio station 9 Analog and digital modulation methods 10 Radio modem technique, radio network structure 11 Radio access methods, FDMA, TDMA, CDMA, SDMA 12 Wireless telecommunication link, radio link, practical aspects 13 Cellular telephone concepts 14 Telecommunication satellite, global telecommunications 15 Wireless systems and techniques, development trends						
Prerequisites and co-requisites		No requirements						
Assessment methods and criteria		Subject passing criteria		Passing threshold		Percentage of the final grade		
		Written exam		50.0%		70.0%		
		Activity		0.0%		15.0%		
		Practical exercise		50.0%		15.0%		
Recommended reading		Basic literature		Katulski R.J.: Propagacja fal radiowych w telekomunikacji bezprzewodowej, WKŁ, 2009				
		Supplementary literature		No requirements				
		eResources addresses						

Example issues/ example questions/ tasks being completed	Structure and operation of transmitter and receiver equipments
Work placement	Not applicable
