

Subject card

Subject name and code	Computer Networks - laboratory, PG_00048819						
Field of study	Electronics and Telecommunications						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			Polish		
Semester of study	6	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Krzysztof Nowicki				
	Teachers		dr inż. Krzysztof Nowicki				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	30.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	Familiarize students with the actual hardware solutions, networking devices diagnostic methods, principles of management of the networks, ensuring security of computer networks						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_U31] can identify telecommunications network architectures, differentiates their areas and functional elements, evaluates the quality of service delivery, calculates parameters of functional elements		The student is able to distinguish between areas of computer networks operation and to design, configure and evaluate the correctness of computer networks operation		[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information		
	[K6_W35] Knows the concepts of the technique of signal transmission, operation of telecommunications networks and multimedia services and the rules for providing them		The student knows the concepts of IPv4 network diagnostics, network equipment management, VLAN, Static and dynamic routing, datagram filtering, network security and principles of wireless networks		[SW1] Assessment of factual knowledge		
Subject contents	<p>IPv4 Network Diagnostics,</p> <p>IPv6</p> <p>Management of Network Hardware</p> <p>Virtual LANs (VLANs)</p> <p>Static Routing</p> <p>Dynamic Routing</p> <p>Cisco ACL</p> <p>Firewall filtering datagrams</p> <p>WiFi 802.11 Wireless Networks</p> <p>Modes of access points</p> <p>Network security of IEEE 802.11</p>						
Prerequisites and co-requisites	Lecture "Computer Networks"						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		Practical exercises - checking + rating implementation exercises	50.0%
Recommended reading	Basic literature	Dedicated auxiliary materials - scripts Nowicki K., Światowiak J.: Protokoły IPv6, PG, 2002 Nowicki K., Woźniak J.: Przewodowe i bezprzewodowe sieci LAN, OW PW 20	
	Supplementary literature	Nowicki K., Uhl T. : Monitorowanie i bezpieczeństwo sieci komputerowych, WN AMG, 2016	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Build a network of reliable Build a network is a safe		
Work placement	Not applicable
