

Subject card

Subject name and code	Human-computer interaction, PG_00045305						
Field of study	Data Engineering						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	4		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Marcin Sikorski				
	Teachers		prof. dr hab. inż. Marcin Sikorski dr inż. Igor Garnik				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	60		8.0		32.0	100
Subject objectives	<ul style="list-style-type: none">familiarize students with the principles of building effective human-computer interactionlearn how to design, evaluate and improve ergonomics of the user interfaceacquire practical skills of conducting usability tests and organizing cooperation with users during an IT project						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_K03] Knows how to cooperate or work in a project team and take managerial or executive functions.		Student is able to work in a team and organize cooperation between supplier and customersr/users in an IT project		[SK1] Assessment of group work skills		
	[K6_U02] designs, analyses correctness and creates functional specification of IT systems, selects appropriate measures, creates quality models, prepares and assesses their design documentation.		Student is able to work in a team and organize cooperation between supplier and customersr/users in an IT project		[SU1] Assessment of task fulfilment		
	[K6_W11] has knowledge of the role of man in social structures and the impact of their decisions on economic situation of business entities		The student has an extended knowledge on guidelines for interaction design and on methods of developing the user interface		[SW1] Assessment of factual knowledge		

Subject contents	1. Ergonomics, usability and User Experience. 2. Characteristics of the user. 3. GUI interface - guidelines and principles of design. Methods of development. 4. Web interface - guidelines and principles of design. Methods of development. 5. UCD approach - quality management, User-Centred Design methodology. 6. UCD approach - methods for eliciting requirements, context of use analysis. 7. UCD approach prototyping , evaluation and usability tests. 8. UCD approach collecting data from users. Surveys and questionnaires. 9. UCD approach reporting results from usability studies. 10. Methods of collaboration with users in IT projects. 11. Multimodal and natural user interfaces. 12. Developing economic interactions. Trust on-line in e-business and in e-services. 13. Creativity and innovation in developing interactions on-line between customer and service vendor. 14. Human interaction with "smart" systems.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	laboratory exercises	60.0%	50.0%
	written colloquium	60.0%	50.0%
Recommended reading	Basic literature	Literatura podstawowa: Sharp H., Rogers Y., Preece J.: Interaction Design. Beyond Human-Computer Interaction. Wiley, 2011. Sikorski M. (2011). User-System Interaction Design in IT Projects.Politechnika Gdańska, Gdańsk, 2011
