

Subject card

Subject name and code	Human-computer interaction, PG_00045305						
Field of study	Data Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Marcin Sikorski				
	Teachers		prof. dr hab. inż. Marcin Sikorski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	30.0	0.0	0.0	60
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours	Self-study	SUM		
	Number of study hours	60	8.0	32.0	100		
Subject objectives	<ul style="list-style-type: none"> familiarize students with the principles of building effective human-computer interaction learn how to design, evaluate and improve ergonomics of the user interface acquire practical skills of conducting usability tests and organizing cooperation with users during an IT project 						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U02] designs, analyses correctness and creates functional specification of IT systems, selects appropriate measures, creates quality models, prepares and assesses their design documentation.	Student is able to work in a team and organize cooperation between supplier and customer/users in an IT project			[SU1] Assessment of task fulfilment		
	[K6_K03] Knows how to cooperate or work in a project team and take managerial or executive functions.	Student is able to work in a team and organize cooperation between supplier and customer/users in an IT project			[SK1] Assessment of group work skills		
	[K6_W11] has knowledge of the role of man in social structures and the impact of their decisions on economic situation of business entities	The student has an extended knowledge on guidelines for interaction design and on methods of developing the user interface			[SW1] Assessment of factual knowledge		
Subject contents	<ol style="list-style-type: none"> Ergonomics, usability and User Experience. Characteristics of the user. GUI interface - guidelines and principles of design. Methods of development. Web interface - guidelines and principles of design. Methods of development. UCD approach - quality management, User-Centred Design methodology. UCD approach - methods for eliciting requirements, context of use analysis. UCD approach prototyping, evaluation and usability tests. UCD approach collecting data from users. Surveys and questionnaires. UCD approach reporting results from usability studies. Methods of collaboration with users in IT projects. Multimodal and natural user interfaces. Developing economic interactions. Trust on-line in e-business and in e-services. Creativity and innovation in developing interactions on-line between customer and service vendor. 						
Prerequisites and co-requisites							

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	laboratory exercises	60.0%	50.0%
	written colonium	60.0%	50.0%
Recommended reading	Basic literature	Literatura podstawowa: Sharp H., Rogers Y., Preece J.: Interaction Design. Beyond Human-Computer Interaction. Wiley, 2011. Sikorski M. (2011). User-System Interaction Design in IT Projects. Politechnika Gdańska, Gdańsk, 2011	
	Supplementary literature	Schneiderman B., et al. (2017). Designing the User Interface: Strategies for Effective Human-Computer Interaction. Pearson	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Exemplary questions: - user-system interaction techniques - prototyping in user interface design - methods of cooperation with users during an IT project		
Work placement	Not applicable
