

Subject card

Subject name and code	Databases, PG_00045301						
Field of study	Data Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			English		
Semester of study	3	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Software Engineering -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor	prof. dr hab. inż. Krzysztof Goczyła					
	Teachers	dr hab. inż. Agnieszka Landowska dr inż. Aleksandra Karpus mgr inż. Małgorzata Pykała prof. dr hab. inż. Krzysztof Goczyła					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	45	8.0		47.0	100	
Subject objectives	The aim of the course is introduction the student to functions of a database management system, to the rules of relational database desing and to construction of SQL statements.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K6_U01] programs in procedural, object, functional and logic programming languages, codes programs at the processor instruction level, runs and tests programs.	The student is able to evaluate the quality of an SQL statement and knows how to test and tune it			[SU4] Assessment of ability to use methods and tools [SU1] Assessment of task fulfilment		
	[K6_W07] Knows the methods of information processing, storage, extraction of data stored in various models including: relational, graph and document ones	The student is able to design and to normalize a relational database, as well as how to query it using SQL.			[SW1] Assessment of factual knowledge		

	eResources addresses	Adresy na platformie eNauczenie: Databases (Data Engineering) - 2023 - Moodle ID: 30715 https://enauczenie.pg.edu.pl/moodle/course/view.php?id=30715
Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. Construct an entity relationship model for an example real-life case 2. Construct and create a relational database 3. Formulate a query to a relational database 4. Specify the operators of relational algebra 5. Give reasons for violation of the second and third normal form 6. Normalize a sample database 	
Work placement	Not applicable
