

Subject card

Subject name and code	Computer networks - lectures, PG_00045321						
Field of study	Data Engineering						
Date of commencement of studies	October 2022	Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies	Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	3	Language of instruction			English		
Semester of study	5	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Computer Communications -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		prof. dr hab. inż. Józef Woźniak				
	Teachers		prof. dr hab. inż. Józef Woźniak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		10.0		60.0	100
Subject objectives	The student becomes familiar with the network layered logical architectures, classifies the basic problems of network communication and identifies and analyzes selected protocols and mechanisms of LAN and WAN (IP) networks						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W02] Knows and understands the standards of network management, architecture, technologies and services of telecommunications networks. Knows the main protocols of packet networks, understands the operation of local networks and network connection rules.		The student has knowledge about basic network architectures and communication protocols. The student knows and understands the mechanisms of creating virtual networks in a LAN environment. The student has knowledge on wired and wireless networks described by the standards of the IEEE 802 series. The student has knowledge on the basic IP network protocols and selected network services and applications		[SW1] Assessment of factual knowledge		
[K6_U02] designs, analyses correctness and creates functional specification of IT systems, selects appropriate measures, creates quality models, prepares and assesses their design documentation.		Student describes and compares various network solutions. The student has knowledge of the basic principles and methods of security in networks. The student has knowledge about selected network applications and the principles of their implementation.		[SU2] Assessment of ability to analyse information			
Subject contents	1. Classification and general characteristics of computer networks 2. Layered network architectures - ISO-OSI, TCP / IP 3. LAN networks - general characteristics - classification of access methods 4. Wired solutions of the contention type: Ethernet networks - MAC layer functions and principles of access to the medium - IEEE 802.3 standard 5. Wireless LANs - general characteristics, IEEE 802.11 standard - operating modes and access methods 6. New Ethernet technologies 7. LAN connection methods, VLANs 8. Internetworking 9. Wide area computer networks - WAN networks 10. TCP / IP architecture - IP protocols and UDP / TCP transport protocols 11. IP protocols, addressing, 12. Routing methods in WAN networks 13. Flow control between end systems in IP networks. 14. Congestion control methods in IP networks. 15. Network security 16. Selected network services and applications.						
Prerequisites and co-requisites	There are no entry requirements						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		written exam	50.0%
Recommended reading	Basic literature	Tannenbaum A.: Computer Networks. Prentice Hall Stallings W.: High Speed Networks and Internets. Prentice Hall	
	Supplementary literature	Nowicki K., Woźniak J. : Przewodowe i bezprzewodowe sieci LAN. Oficyna Wyd. PW. Nowicki K, Światowiak J.: Protokoły IPv6 Woźniak J., Nowicki K.: Sieci LAN, MAN, WAN - protokoły komunikacyjne. Wyd. Postępu Telekomunikacji Nowicki K.: Materiały z wykładu Sieci Ethernet; Krawczyk H., Kaczmarek S. Nowicki K.: Aplikacje i usługi a technologie sieciowe. PWN 2018	
	eResources addresses		
Example issues/ example questions/ tasks being completed	Description of network architectures and basic standards. Comparison of standard wired and wireless LAN networks. Comparison of network connection methods and devices. Description of addressing methods in LAN and WAN networks. Description of selected routing protocols and basic communication protocols in IP networks. Description of selected network applications.		
Work placement	Not applicable
