

## Subject card

Subject name and code	Social and Psychological Aspects of Robotics & Automatic Controls, PG_00047413						
Field of study	Automatic Control, Cybernetics and Robotics						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Humanistic-social subject group		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	2		Language of instruction		English		
Semester of study	3		ECTS credits		2.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Decision Systems and Robotics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Czubenko				
	Teachers		dr inż. Michał Czubenko				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		2.0		18.0	50
Subject objectives	The basic aim of the course is to acquaint participants with the philosophical, psychological and sociological aspects of robotics and automation. In particular, issues such as: three laws of robotics, transfer of natural systems to mechanized systems, humanoid currents in robotics, autonomy of robots, and legal issues related to autonomous robots will be raised.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W71] has general knowledge in humanistic, social, economic or legal sciences, including their fundamentals and applications		Student has the basics of psychological and sociological knowledge in the aspect of RiA.		[SW1] Assessment of factual knowledge		
	[K7_U71] is able to apply knowledge from humanistic, social, economic or legal sciences in order to solve problems		Student is able to assess the long-term social effects of the aspects of robotization.		[SU5] Assessment of ability to present the results of task [SU2] Assessment of ability to analyse information		
	[K7_K71] is able to explain the need to apply knowledge from humanistic, social, economic or legal sciences in order to function in a social environment		Student can refer to certain socio-psychological values at work.		[SK4] Assessment of communication skills, including language correctness		
Subject contents	<div>The subject will cover issues such as:</div> <ul style="list-style-type: none"><li>the progressive development of artificial intelligence and its impact on society</li><li>humanoid robotics</li><li>can robots have emotions</li><li>development of robotization in the context of human support</li><li>development of vehicle autonomy and its effects</li><li>the loss of society in social media</li></ul>						
Prerequisites and co-requisites	Basic knowledge of Robotics and Artificial Intelligence.						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
		60.0%	100.0%
