

Subject card

Subject name and code	Satellite Observation Sensors, PG_00050022						
Field of study	Space and Satellite Technologies, Space and Satellite Technologies						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		exam		
Conducting unit	Department of Geoinformatics -> Faculty of Electronics, Telecommunications and Informatics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Tomasz Berezowski				
	Teachers		dr inż. Tomasz Berezowski				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		8.0		22.0	75
Subject objectives	Acquisition of knowledge and practical skills in the field of sensors used in satellite remote sensing and Earth observation: physical basis of phenomena used in remote sensing, principles of operation of individual sensors, data obtained from sensors, data processing methods, applications						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	K7_U08	The student knows the limitations of various satellite sensors and the resulting limitations in the processing of data from these sensors	[SU4] Assessment of ability to use methods and tools [SU2] Assessment of ability to analyse information
	K7_W13	The student is able to describe the construction of various modern satellite sensors	[SW1] Assessment of factual knowledge
	K7_W05	The student can describe the operation of various modern satellite sensors	[SW1] Assessment of factual knowledge
	K7_W12	The student is able to use IT tools for processing data from satellite sensors and is able to use these tools to analyze the operation of sensors.	[SW1] Assessment of factual knowledge
	K7_U09	The student is able to process data from satellite sensors and analyze the operation of satellite sensors	[SU4] Assessment of ability to use methods and tools [SU3] Assessment of ability to use knowledge gained from the subject
Subject contents	Sensor bands and types. Visible and infrared scanners, types of detectors. Passive thermal and microwave sensors. Radar range, imaging radars. Processing and use of radar images. Synthetic aperture radar (SAR) - principle and basic properties. Synthesis and processing of SAR images. SAR interferometry and polarimetry. Implementation of software for processing satellite data from specific sensors. SRF calculation, radiation transfer models.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratories	50.0%	50.0%
	Written egzam	50.0%	50.0%
