

Subject card

Subject name and code	Diploma seminar , PG_00057273						
Field of study	Power Engineering, Power Engineering, Power Engineering						
Date of commencement of studies	February 2023	Academic year of realisation of subject				2023/2024	
Education level	second-cycle studies	Subject group				Optional subject group	
Mode of study	Full-time studies	Mode of delivery				at the university	
Year of study	2	Language of instruction				Polish	
Semester of study	3	ECTS credits				2.0	
Learning profile	general academic profile	Assessment form				assessment	
Conducting unit	Zakład Ogrzewnictwa, Wentylacji, Klimatyzacji i Chłodnictwa -> Institute of Energy -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jan Wajs				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	0.0	0.0	0.0	30.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		4.0		16.0	50
Subject objectives	The aim of the subject is to monitor progress in diploma activities. The aim is also to develop the student's ability to present the results obtained and to publicly discuss/defend the proposed solutions.						
Learning outcomes	Course outcome		Subject outcome			Method of verification	
	[K7_W09] knows and understands the basic concepts and principles of industrial property protection and copyright law and the need for intellectual property management, is able to use patent information resources		The student understands the meaning of intellectual property and copyright protection, is able to use the resources of patent information.			[SW1] Assessment of factual knowledge	
	[K7_K03] is able to think and act creatively and entrepreneurially, is aware of the responsibility for his/her own work and takes responsibility for teamwork		The student is able to establish professional contacts and is able to lead a team and work in a group taking various roles in it; can demonstrate entrepreneurship and innovation in the implementation of professional tasks.			[SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness	
	[K7_K01] is aware of the necessity of self-education and self-improvement within the scope of his/her occupation as a power engineer and possibilities of further education		The student is aware of the need of continuous learning, is able to choose the appropriate methods of self-learning and teaching the others.			[SK5] Assessment of ability to solve problems that arise in practice	
	[K7_U01] is able to acquire information from literature, databases and other sources, has the ability of self-education in order to improve his/her professional competence (also in English), is able to prepare a simple scientific paper and its summary in English, as well as an oral presentation		The student is able to obtain information from professional literature and other sources (also in foreign-language) in the field of machines construction, their operation and related issues, and to conduct a process of selfeducation. She/he can synthesize gained knowledge as well as formulate conclusions and justify opinions.			[SU2] Assessment of ability to analyse information	
Subject contents	Basic information on intellectual property in European and national levels. Individual student's work related to the preparation of the subsequent stages of the thesis, the results are presented and evaluated during the seminar.						
Prerequisites and co-requisites	knowledge in the fields of thermomechanics, heat transfer and heat exchangers, refrigeration, air conditioning, heat pumps, polygeneration systems						

Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	presentation	60.0%	50.0%
	discussion	60.0%	50.0%
