

Subject card

Subject name and code	Nanotechnology in biomaterials, PG_00057490						
Field of study	Mechanical and Medical Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2022/2023		
Education level	second-cycle studies		Subject group		Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	1		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Technologii Biomateriałów -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Bartmański				
	Teachers		prof. dr hab. inż. Andrzej Zieliński dr inż. Michał Bartmański dr inż. Marcin Wekwejt				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	15.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		10.0		45.0	100
Subject objectives	The aim of the course is to provide knowledge on the following issues: nanotechnologies in biomaterials in diagnostics; in dentistry and maxillofacial surgery; in orthopedics; in cardiology; in internal medicine; in ophthalmology; in surgery; in pharmacotherapy and other medical applications. In addition, the student will be introduced to methods of fabricating surface modifications of implants using nanotechnology and methods of testing them.Translated with www.DeepL.com/Translator (free version)						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_K02] He/she understands outer aspects of influence of mechanical engineer and manager, their social consequences and impact on the environment, needs to follow the rules of ethics and respect for the diversities of views and cultures	The student knows the ethical aspects of bionanomaterials research, including research using living organisms, and the environmental impact of nanomaterials.	[SK1] Assessment of group work skills [SK2] Assessment of progress of work
	[K7_U08] He/she can formulate and verify hypotheses for simple engineering problems and research	The student is able to independently develop simple experiments and determine the effect of manufacturing parameters of surface modification of biomaterials on their properties.	[SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment
	[K7_K01] He/she is aware to acquire the knowledge through the whole life, is able to inspire and to organize to teach himself/herself and others in cooperation and in leading position	The student is able to perform the design of the surface modification technology of a long-term implant as part of group work.	[SK2] Assessment of progress of work [SK1] Assessment of group work skills
	[K7_W07] He/she in-depth knowledge related to engineering materials and technologies used in mechanical-medical engineering	The student has knowledge in the application of nanobiomaterials in medicine. The student knows basic methods of their surface modification in various fields of medicine.	[SW3] Assessment of knowledge contained in written work and projects
Subject contents	Nanotechnologies in biomaterials in diagnostics; in dentistry and maxillofacial surgery; in orthopedics; in cardiology; in internal medicine; in ophthalmology; in surgery; in pharmacotherapy; in other medical applications. Methods for modification of implant surfaces using nanotechnology. Project of implant surface modification technology.		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Laboratory	56.0%	20.0%
	Project	56.0%	20.0%
	Colloquium	56.0%	60.0%
