

Subject card

Subject name and code	Advanced measuring systems, PG_00057387						
Field of study	Mechanical Engineering						
Date of commencement of studies	February 2023		Academic year of realisation of subject		2023/2024		
Education level	second-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	1		Language of instruction		Polish		
Semester of study	2		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Zakład Technologii Maszyn i Automatyzacji Produkcji -> Institute of Manufacturing and Materials Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Michał Dobrzyński				
	Teachers						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		6.0		39.0	75
Subject objectives	The aim of the course is to familiarize students with advanced measuring devices used inproduction plants and the trends in their development.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_W06] possesses organized, profound knowledge necessary for designing and optimization of complex technological processes, modelling and calculations using numerical methods, knows modern manufacturing methods and tools for designing manufacturing processes of machines, devices, their elements and components		The student will have knowledge in the field of designing measurement processes and their optimization and alignment.		[SW1] Assessment of factual knowledge		
	[K7_W07] possesses profound knowledge on the diagnostics and monitoring of the condition of devices, assemblies and technical systems, as well as measurement methods of process and operation control		The student will have knowledge in the field of metrology and quality control with the use of advanced measuring means.		[SW1] Assessment of factual knowledge		
	[K7_U07] is able to perform a preliminary economic analysis of the undertaken engineering actions within the range of design, production and operation of machines and technical devices		The student will be able to design a process using advanced measurement techniques and apparatus.		[SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools		

Subject contents	Advanced measuring devices and systems. Vision Measuring Systems (2D/3D). Form Measurement (Surface Roughness and Contour Measuring Instruments). Advanced Optical Measuring Systems (focus variation, interferometry, confocal techniques). Development of a programs with the use of coordinated measuring machines (CMM).		
Prerequisites and co-requisites	Metrology		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Test	50.0%	100.0%
Recommended reading	Basic literature	E. Ratajczyk: Współrzędnościowa technika pomiarowa. OWPW, Warszawa S. Białas: Metrologia z podstawami specyfikacji geometrii wyrobów (GPS). OWPW, Warszawa	
	Supplementary literature	W. Jakubiec: Metrologia wielkości geometrycznych. PWN	
	eResources addresses	Adresy na platformie eNauczanie:	
Example issues/ example questions/ tasks being completed	Coordinate measuring technique.ISO profile method.		
Work placement	Not applicable
