

## SDAŃSK UNIVERSITY 的 OF TECHNOLOGY

## Subject card

| Subject name and code                          | Computer Aided Manufacturing Systems, PG_00054486   |   |  |   |     |  |          |             |  |
|--|---|---|--|---|-----|--|----------|-------------|--|
| Field of study                                 | Mechatronics  |   |  |   |     |  |          |             |  |
| Date of commencement of studies                | February 2023   |   | Academic year of realisation of subject            |   |     | 2022/2023  |          |             |  |
| Education level                                | second-cycle studies  |   | Subject group                                      |   |     |  |          |             |  |
| Mode of study                                  | Full-time studies   |   | Mode of delivery                                   |   |     | at the university  |          |             |  |
| Year of study                                  | 1   |   | Language of instruction                            |   |     | English  |          |             |  |
| Semester of study                              | 1   |   | ECTS credits                                       |   |     | 2.0  |          |             |  |
| Learning profile                               | general academic profile  |   | Assessment form                                    |   |     | assessment   |          |             |  |
| Conducting unit                                | Department of Manufacturing and Production Engineering -> Faculty of Mechanical Engineering and Ship Technology   |   |  |   |     |  |          | ng and Ship |  |
| Name and surname of lecturer (lecturers)       | Subject supervisor  |   | dr hab. inż. Mariusz Deja                          |   |     |  |          |             |  |
|  | Teachers  | dr hab. inż. Mariusz Deja   |  |   |     |  |          |             |  |
| Lesson types and methods                       | Lesson type   | Lecture   | Tutorial   | Laboratory Project Seminar S                            |     | SUM  |          |             |  |
| of instruction                                 | Number of study hours   | 30.0  | 0.0  | 0.0   | 0.0 |  | 0.0      | 30          |  |
|  | E-learning hours inclu  | uded: 0.0   |  |   |     |  |          |             |  |
| Learning activity<br>and number of study hours | Learning activity   | Participation in<br>classes includ  |  | Participation in consultation hours                     |     | Self-study   |          | SUM         |  |
|  | Number of study hours   | 30  |  | 0.0   | 0.0 |  |          | 30          |  |
| Subject objectives                             | Getting acquainted with the subject of computer-aided manufacturing as well as with the tendencies in modern manufacturing  |   |  |   |     |  | ncies in |             |  |
| Learning outcomes                              | Course outcome Subject outcome Method of verificati   |   |  |   |     | ification  |          |             |  |
|  | [K7_U81] is able to communicate<br>with ease in foreign language at<br>B2+ level of the Common<br>European Framework of<br>Reference for Languages (CEFR)<br>in everyday life, in academic and<br>professional environments   |   | The ability to discuss a presented technical topic |   |     | [SU2] Assessment of ability to<br>analyse information                          |          |             |  |
|  | [K7_K82] is equipped to<br>participate actively in lectures,<br>seminars and laboratory classes<br>conducted in foreign language  |   | Ability to communicate in a foreign<br>language    |   |     | [SK4] Assessment of<br>communication skills, including<br>language correctness |          |             |  |
|  | and diverse lexical re<br>needed to communic<br>language in terms of  | c grammatical structures<br>erse lexical resources<br>to communicate in foreign<br>le in terms of general and<br>st language related to field |  | Analysis of specialist literature in a foreign language |     | [SW1] Assessment of factual knowledge  |          | f factual   |  |
| Subject contents                               |   |   |  |   |     |  |          |             |  |
|  | Emergence of multitasking machining systems, applications and best selection practices. Manufacturing System classification. Flexible Manufacturing. Group Technology. Cell formation.Extra clustering algorithms. FMS control introduction. Petri nets fundamentals. CIM Concepts - information integration. Machine tool metrology. Robots in Manufacturing. Trends in the development of computer-aided manufacturing: STEP NC, cyber-physical manufacturing , digital twin in manufacturing. Intelligent manufacturing methods: smart manufacturing, Industry 4.0-based manufacturing systems, feature-based process planning. IoT - Internet of Things. Industrial Internet of Things - Cybermanufacturing Systems. Application Reverse Engineering Technology in Part Design and Manufacturing. |   |  |   |     |  |          |             |  |

| Prerequisites  | Technical drawing, manufacturing  | techniques, basics of cutting techno   | blogies, Computer Aided Design CAD  |  |  |  |
|--|---|--|---|--|--|--|
| and co-requisites  |   |  |   |  |  |  |
| Assessment methods   | Subject passing criteria  | Passing threshold  | Percentage of the final grade   |  |  |  |
| and criteria   | Colloquium  | 50.0%  | 50.0%   |  |  |  |
|  | Presence during lectures  | 50.0%  | 50.0%   |  |  |  |
