

## Subject card

Subject name and code	, PG_00058946						
Field of study	Nanotechnology						
Date of commencement of studies	October 2022		Academic year of realisation of subject		2024/2025		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Division of Magnetic Properties of Materials -> Institute of Nanotechnology and Materials Engineering -> Faculty of Applied Physics and Mathematics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr inż. Marek Augustyniak				
	Teachers		dr inż. Marek Augustyniak				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	30.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		5.0		50.0	100
Subject objectives	<p>The class is supposed to guide students in practical skills related to the computer-aided design. The choice of tools is based on the desire to provide solutions as versatile as possible. In particular, the student shall be helped with:</p> <p>- understanding and creating standard paper product documentation (AutoCAD and similar programs)</p> <p>- understanding the specifics of 3D design, based on at least one of the currently popular programs (Fusion)</p> <p>- application of engineering simulation methods, primarily based on the FEA (free Salome pre-processor, ANSYS computing system)</p>						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K04		Students practice the typical style of engineering work - team work, project work.		[SK2] Assessment of progress of work		
	K6_W04		The students practice generating decent reports with the results of their design and calculation work.		[SW3] Assessment of knowledge contained in written work and projects		
	K6_U03		The student knows the commands of AutoCAD (lub LibreCAD); he/ she is able to use software such as Fusion 360 or OnShape, Salome, Ansys.		[SU1] Assessment of task fulfilment		

Subject contents	Spreadsheet: revision of skillsAutoCAD or equivalent program: interface basics, commands, 2D exercises.ANSYS or equivalent program: physics simulation of single parts (mechanics, heat transfer, optional electromagnetism) - comparison with analytical solutions and experiment, where possibleSALOME + Calculix - free software for 3D modeling and FEM calculations  FUSION 360 or OnShape- a popular, intuitive 3D modeling program, with calculation modules and the option of designing printed circuit boards		
Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Completing design tasks	70.0%	50.0%
	Student participation intensity	80.0%	50.0%
Recommended reading	Basic literature	Software manuals (PDF, online training courses)	
	Supplementary literature	-----	
	eResources addresses	Adresy na platformie eNauczanie: Etyka w pracy inżyniera i naukowca (jesień 2024 / MA) - Moodle ID: 39583 <a href="https://enauczanie.pg.edu.pl/moodle/course/view.php?id=39583">https://enauczanie.pg.edu.pl/moodle/course/view.php?id=39583</a>	
Example issues/ example questions/ tasks being completed	AutoCAD: Appartment Planning  Fusion 360: Designing a Simple Part from Scratch  Salome + Calculix: simple part vibration calculation; work with models from the GrabCAD portal  ANSYS: prediction of the durability of the car towbar		
Work placement	The acquired skills are directly applicable in industry.
