

Subject card

Subject name and code	Chemistry and nanotechnology of cosmetics, PG_00038596						
Field of study	Nanotechnology						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2022/2023		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	3		Language of instruction		Polish		
Semester of study	5		ECTS credits		4.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Colloid and Lipid Science -> Faculty of Chemistry						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Patrycja Szumała				
	Teachers		dr hab. inż. Patrycja Szumała				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	15.0	0.0	0.0	45
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	45		0.0		0.0	45
Subject objectives	Knowing the technology of preparation, composition and use of selected cosmetic products.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	K6_K05		Is able to produce various forms of cosmetic formulations, present information about cosmetic formulations in a generally comprehensible manner, evaluate cosmetics available on the market and described in the literature		[SK5] Assessment of ability to solve problems that arise in practice [SK1] Assessment of group work skills		
	K6_U06		Able to identify various problems and technological and scientific principles related to the production and application of nanostructures in cosmetics		[SU1] Assessment of task fulfilment [SU3] Assessment of ability to use knowledge gained from the subject		
	K6_W07		Has knowledge of the physical and chemical basis of nanotechnology in the field of cosmetics (methods of obtaining nanostructures, types of nanostructures, their properties, basic research methods)		[SW1] Assessment of factual knowledge		

Subject contents	Structure and function of human skin. Compounds affecting the increase in skin barrier. Types of cosmetic products and their performance. Raw materials in cosmetics and criteria for their selection, with particular focus on biologically active materials. Nanomaterials and nanocarriers in cosmetic. Emulsions, nanoemulsions, microemulsions and their construction and method of stabilization. The technology of manufacturing various types of cosmetic emulsions. Surfactants in cosmetics. Haircare products: shampoos, conditioners, conditioning preparations. Make-up preparations. Powders, shadows, ink, lipstick, nail polish, etc. Technology of perfume products. Technology of deodorants and antiperspirants. Legal regulations on raw materials and cosmetic products.		
Prerequisites and co-requisites	Basic knowledge of organic and inorganic chemistry.		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	written exam	50.0%	60.0%
	presence in the laboratory and reports	100.0%	40.0%
