

Subject card

| Subject name and code | Team project I, PG_00059060 | | | | | | | |
|---|---|--|---|--------------------------------|-------------------------------|--|---------|-----|
| Field of study | Materials Engineering, Materials Engineering, Materials Engineering | | | | | | | |
| Date of commencement of | October 2022 | Academic year of | | | 2024/2025 | | | |
| studies | | | realisation of subject | | | 2024/2025 | | |
| Education level | first-cycle studies | | Subject group | | | Optional subject group | | |
| | | | | | | Subject group related to scientific research in the field of study | | |
| Mode of study | Full-time studies | | Mode of delivery | | | at the university | | |
| Year of study | 3 | | Language of instruction | | | Polish | | |
| Semester of study | 5 | | ECTS credits | | | 2.0 | | |
| Learning profile | general academic profile | | Assessment form | | | assessment | | |
| Conducting unit | Institute of Nanotechnology and Materials Engineering -> Faculty of Applied Physics and Mathematics | | | | | | matics | |
| Name and surname | Subject supervisor prof. dr hab. inż. Maria Gazda | | | | | | | |
| of lecturer (lecturers) | Teachers | | | | | | | |
| Lesson types and methods | Lesson type | Lecture | Tutorial | Laboratory | Projec | t | Seminar | SUM |
| of instruction | Number of study hours | 0.0 | 0.0 | 0.0 | 30.0 | | 0.0 | 30 |
| | E-learning hours inclu | uded: 0.0 | | | | | | |
| Learning activity and number of study hours | Learning activity | Participation i classes include plan | | Participation i consultation h | cipation in ultation hours | | udy | SUM |
| | Number of study hours | 30 | | 2.0 | | 18.0 | | 50 |
| Subject objectives | The aim of the course is to prepare students to work in teams and develop skills necessary for effective management of engineering projects. Students learn to cooperate with each other and gain practical experience in planning, organizing, monitoring and controlling the course of the project. | | | | | | | |
| Learning outcomes | Course outcome | | Subject outcome | | | Method of verification | | |
| | K6_U10 | | can cooperate in a group to solve simple problems in the field of materials engineering using available technical possibilities | | | [SU1] Assessment of task fulfilment | | |
| | K6_W07 | | has detailed knowledge related to issues related to the implemented project | | | [SW3] Assessment of knowledge contained in written work and projects | | |
| | K6_K02 | is able to think and act in a creative and entrepreneurial way, has the ability to negotiate, is able to cooperate in a project team, taking on various roles necessary in the implementation of the proje | | | s able m, ssary | [SK2] Assessment of progress of work | | |
| | K6_U11 | | during project implementation, student also notices and analyzes its environmental, economic and legal aspects. Applies occupational health and safety rules | | | [SU1] Assessment of task fulfilment | | |
| Subject contents Prerequisites | Students will be divided into teams of 2-4 people. They will choose the project they will implement. Project topics will be proposed in advance by academic teachers. The student team may also, in consultation with the lecturer and/or another academic teacher, propose a topic for implementation. Each team, under the supervision of its supervisor, will implement the project: Initial analysis: information collection, risk assessmentProject planning: Development of a schedule: project stages and implementation deadlines. Analysis of materials and resources necessary to implement the project. Project implementation: team meetings, carrying out project tasks according to the schedule, analysis and verification of results. Project completion: delivery of results in the form of a report; summary of the project; conclusions; presenting results to members of other teams. | | | | | | | |
| and co-requisites | | | | | | | | |
