

## 。 GDAŃSK UNIVERSITY OF TECHNOLOGY

## Subject card

Subject name and code	Air protection , PG_00059096							
Field of study	Environmental Engineering							
Date of commencement of studies	October 2022		Academic year of realisation of subject			2024/2025		
Education level	first-cycle studies		Subject group			Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery			at the university		
Year of study	3		Language of instruction			Polish		
Semester of study	5		ECTS credits			2.0		
Learning profile	general academic profile		Assessment form			assessment		
Conducting unit	Department of Enviro	Department of Environmental Engineering Technology -> Faculty of Civil and Environmental Engine					ngineering	
Name and surname	Subject supervisor dr hab. inż. Katarzyna Kołecka							
of lecturer (lecturers)	Teachers							
Lesson types and methods	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM
of instruction	Number of study hours	10.0	5.0	0.0	0.0		0.0	15
	E-learning hours inclu	ded: 0.0						
Learning activity and number of study hours	Learning activity	Participation in classes includ plan	n didactic ed in study	Participation in consultation hours		Self-study		SUM
	Number of study hours	15		1.0		34.0		50
Subject objectives	Student gains the knowledge of the unit processes related to pollutant emissions, their transformations and technologies for their removal.							
Learning outcomes	Course outcome		Subject outcome			Method of verification		
	[K6_W04] possesses elementary knowledge in the field of land mechanics, ground science, land reclamation and geotechnics; has basic knowledge about the composition of air, water and soil, environmental pollution and processes responsible for their formation and ways to reduce them, knows the principles and organization of sustainable water management		The student has an elementary knowledge of the composition of the air, its pollutants and the processes responsible for their formation and methods of reducing them.			[SW2] Assessment of knowledge contained in presentation		
	[K6_K01] can think and act in a creative and enterprising way; can set priorities for the implementation of an individual or group task; understands the need for continuous training and professional responsibility for their activities and team [K6_W13] has a structured knowledge of current legal		The student is able to think and act creatively, can set priorities to achieve a task, understands the need for continuous learning, and takes professional responsibility for their own work as well as for the team's activities. The student has knowledge regarding current legal regulations are air protections			[SK4] Assessment of communication skills, including language correctness [SW2] Assessment of knowledge contained in presentation		
	regulations regarding environmental protection, water and construction law; knows the basics of public procurement law, patent law, intellectual property protection and labor protection K6_W12		The student understands the basic physical and chemical processes occurring within the atmosphere.			[SW2] Assessment of knowledge contained in presentation		

Subject contents	Chemical composition of the atmosphere. Structure of the atmosphere. Earth's energy balance. Importance of the ozone layer and greenhouse gases for Earth's inhabitants. Energy production structure in the European Union and Poland. Energy carriers physical and chemical properties. Processes occurring in the atmosphere. Types of air pollutants and their sources. Characteristics of primary pollutants. Emissions of major pollutants in Poland. Impact of selected pollutants on the environment. Protection of atmospheric air from pollution. Legal acts related to air protection. Renewable energy sources.					
Prerequisites and co-requisites	Good knowledge of subject Chemistry (SNPK07)					
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade			
	Presentation	60.0%	100.0%
