

Subject card

Subject name and code	Soil mechanics and soil science, PG_00059165								
Field of study	Environmental Engineering								
Date of commencement of studies	October 2022		Academic year of realisation of subject			2023/2024			
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study			
						Subject group related to scientific research in the field of study			
Mode of study	Full-time studies		Mode of delivery			at the university			
Year of study	2		Language of instruction			Polish			
Semester of study	3		ECTS credits			4.0			
Learning profile	general academic profile		Assessment form			assessment			
Conducting unit	Department of Geote	Department of Geotechnical and Hydraulic Engir			of Civi	l and Er	nvironmental l	Engineering	
Name and surname	Subject supervisor	dr inż. Krzysztof Szarf							
of lecturer (lecturers)	Teachers		dr inż. Mariusz Wyroślak						
			dr inż. Witold Tisler						
			dr inż. Krzysztof Szarf						
			di IIIZ. NIZYSZ						
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	t	Seminar	SUM	
	Number of study hours	15.0	0.0	30.0	0.0		0.0	45	
	E-learning hours included: 0.0								
Learning activity and number of study hours	Learning activity	ing activity Participation in classes including plan				Self-study SUM		SUM	
	Number of study hours	45		6.0		50.0		101	
Subject objectives	The aim of the class is to tech the students basics of soil mechanics and soil classification.								
Learning outcomes	Course outcome Subject outcome Method of verification						ification		
	[K6_K01] can think and act in a creative and enterprising way; can set priorities for the implementation of an individual or group task; understands the need for continuous training and professional responsibility for their activities and team		Student is aware of the role of soil in the engineering tasks Student is able to work in the laboratory in a team			[SK3] Assessment of ability to organize work [SK2] Assessment of progress of work			
	[K6_U16] can, when formulating and solving engineering tasks in environmental engineering, evaluate, select and apply appropriate methods and tools, recognize their non-technical aspects, including environmental, economic and legal aspects		Student is able to solve exercises on geotechnics using analytical methods			[SU1] Assessment of task fulfilment			
	[K6_W04] possesses elementary knowledge in the field of land mechanics, ground science, land reclamation and geotechnics; has basic knowledge about the composition of air, water and soil, environmental pollution and processes responsible for their formation and ways to reduce them, knows the principles and organization of sustainable water management		Student learnt soil mechanics in the scope of the course Student learnt soil classification in the scope of the course Student is knowledgeable about geotechnical problems			[SW1] Assessment of factual knowledge			

Data wydruku: 07.05.2024 04:20 Strona 1 z 2

Lectures:1. Introduction to soil mechanics2. Water in soil3. Filtration. Freezing of soils4. Stresses in soil5. Compressability of soil6. Strength of soils – shear strength7. Bearing capacity of shallow foundations8. Consolidation9. Lateral stresses in soil. earth pressure 10. Geotechnical failures. Soil reinforcement11. Stability of slopesLaboratory classes:1. Macroscopic tests on coarse soils and on fire soils2. Physical quantities of coarse soils3. State of coarse soils yindex4. State of fine soils – consistency limits5. Filtration6. Granulometric curve of a coarse soil. Experiment with the Proctor apparatus8. Experiments with the edometer9. Soil strength testing using the triaxial apparatus and the direct shear apparatus Prerequisites and co1-requisites Basic knowledge of classical mechanics, mathematics, geology Subject passing criteria Passing threshold Percentage of the final grade test 45.0% 50.0% [aboratory work passed 100.0% 50.0% Recommended reading Basic literature Amold Verruijt, Soil Mechanics, TU Delft, 2012 Supplementary literature Braja M. Das, Fundamentals of Geotechnical Engineering, Cengage Learning, 2012 eResources addresses Podstawove https://enauczanie.pg.du.pl/moodle/course/view.php?id=33426 - eNauczanie course (in Polish, winter semester 2023/2024) Adresy na platformie eNauczanie: Example issues/ example questions/ tasks being completed Give a typical value of particle density of soil What quantities are used in Darcy's Law? Laboratory: Laboratory: To perform every test in the laboratory. Prepare a lab report for each test. Test.	Subject contents							
Assessment methods and criteria Subject passing criteria Passing threshold Percentage of the final grade test 45.0% 50.0% 1aboratory work passed 100.0% 50.0%		Compressability of soil6. Strength of soils shear strength7. Bearing capacity of shallow foundations8. Consolidation9. Lateral stresses in soil: earth pressure10. Geotechnical failures. Soil reinforcement11. Stability of slopesLaboratory classes:1. Macroscopic tests on coarse soils and on fine soils2. Physical quantities of coarse soils3. State of coarse soils density index4.
