

Subject card

Subject name and code	Operational Research, PG_00037970						
Field of study	Management, Management						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	1	ECTS credits			4.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. Jolanta Łopatowska					
	Teachers	dr inż. Jolanta Łopatowska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	16.0	8.0	0.0	0.0	0.0	24
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	24	5.0		71.0		100
Subject objectives	The aim of the course is the acquisition knowledge and analytical skills regarding the identification and formulation of decision-making problems in quantitative form and methods of solving them.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U04] models and forecasts socio-economic processes using advanced quantitative and qualitative methods	Solves problems using optimization methods(algorithms)in practice.			[SU4] Assessment of ability to use methods and tools		
	[K7_K04] acts in accordance with the principles of building relations and managing processes and projects, organizing them for the benefit of the company and anticipating the consequences of decisions made	Analyzes and joins technical and economical as well as organizational problems.			[SK5] Assessment of ability to solve problems that arise in practice		
	[K7_W08] has an in-depth knowledge of selected methods and techniques supporting economic decision-making processes	Defines of basic mathematical programming concepts. Presents basic models of solving problems of mathematical programming. Has knowledge about the classification of mathematical models to use it in practice and about methods and techniques for solving them.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	The basic problems of operations research - the essential features and the structure of the decision situation. The general form of linear optimization model, interpretation and sensitivity analysis of the solution. Construction of linear optimization models - assortment selection model, cutting model, technological process optimization model, transport model, assignment model of mutually replaceable resources. Graphic method, simpleks algorithm. Dual linear optimization model. Multi-criteria models. Elements of graph theory. Planned network - CPA, CPM, PERT, CCPM method. Ford-Fulkerson algorithm. Sequential issue. Elements of dynamic programming						

Prerequisites and co-requisites	mathematics, management		
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Exam	60.0%	50.0%
	Colloquium	60.0%	50.0%
