Subject objectives	The aim is to acquire the practical skills to construct models of the processes using iGrafx Process software, simulation experiments, inference based on simulation results.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K7_U02] analyses complex economic processes and phenomena using selected methods and techniques for analysing socio-economic data, and formulates their own opinions and conclusions concerning these processes and phenomena		Is able to apply iGrafx Process software for building process models, conduct simulation experiments and draw conclusions based on the results.		[SU1] Assessment of task fulfilment		
	[K7_W07] knows in depth selected methods and techniques of data acquisition, enabling analysis and modelling of structures and socio-economic relations, processes taking place and their impact on the implementation of objectives of the organization, including government administration, local government and non-profit organizations		Has knowledge of methods and tools for process modeling applied in business practice.		[SW1] Assessment of factual knowledge		
Subject contents	Basic concepts and definitions, getting familiar with iGrafx Process, process mapping, basic symbols (events, activities, getways). Simulation components: schedules, generators, resources, activities, attributes, functions, decision getways, charts, scenarios and reports. Simulation environment settings, scenarios. Realization of tasks according to given parameters, simulating, analyzing results, optimizing the process. Examination task.						
Prerequisites and co-requisites							
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	Class exercise		60.0%		100.0%
