

表 GDAŃSK UNIVERSITY OF TECHNOLOGY

Subject card

Subject name and code	Materials Technology in Sanitary Systems , PG_00059184							
Field of study	Environmental Engineering							
Date of commencement of studies	October 2022		Academic year of realisation of subject			2023/2024		
Education level	first-cycle studies		Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Part-time studies		Mode of delivery			at the university		
Year of study	2		Language of instruction		Polish polish			
Semester of study	4		ECTS credits		5.0			
Learning profile	general academic profile		Assessment form		assessment			
Conducting unit	Department of Sanitary Engineering -> Faculty of Civil and Environmental Engineering							
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Jakub Drewnowski					
	Teachers						_	
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Projec	oject Semina		SUM
	Number of study hours	20.0	0.0	15.0	0.0		0.0	35
	E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in classes includ	n didactic led in study	Participation in consultation hours		Self-study		SUM
	Number of study hours	35		6.0		84.0		125
Subject objectives	The aim of the course is to make the methods of distinguishing the features and properties of installation materials and, on this basis, to select the right materials and techniques of connecting conduits for the construction of sanitary networks and installations.							

Learning outcomes	Course outcome	Subject outcome	Method of verification					
	[K6_U13] knows the rules of application and can choose the materials of the sanitary industry	Selects materials for the construction of sanitary networks and installations.	[SU5] Assessment of ability to present the results of task [SU3] Assessment of ability to use knowledge gained from the subject [SU1] Assessment of task fulfilment [SU4] Assessment of ability to use methods and tools					
	[K6_U14] can organize, estimate executive construction works (installation) in accordance with the principles of construction technology and organization, apply the principles of safety and health at work during the implementation of engineering tasks	A student demonstrates wire connection techniques.	[SU2] Assessment of ability to analyse information [SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task					
	[K6_K02] understands the need to formulate and communicate to the public information and opinions on the achievements of environmental engineering and other aspects of the sanitary industry engineer's activity; is aware of the importance and understands the non-technical aspects and effects of engineering activities; makes efforts to provide such information and opinions in a widely understandable way, presenting different points of view	The student understands the effects of a sanitary engineer's activities, the impact on the environment and the associated responsibility for the decisions made.	[SK1] Assessment of group work skills [SK2] Assessment of progress of work [SK3] Assessment of ability to organize work [SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice					
	[K6_W07] has a structured and theoretically founded knowledge in the field of materials used in the sanitary industry, their physico- chemical properties; knows and understands the basic processes of their production	The student distinguishes between the features and properties of installation materials.	[SW2] Assessment of knowledge contained in presentation [SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects					
Subject contents	LECTURE: Physical, mechanical, thermal and chemical properties of materials. Metals and their alloys are the iron-cementite phase equilibrium system. Classification, types and applications of steel, cast iron and cast steel. Heat, thermo-chemical and plastic treatment of steel and cast iron. Non-ferrous metals and their alloys manufacturing process, properties and application. Polymers preparation, properties and application. Ceramic, concrete, reinforced concrete and composite products production, properties and application. Material selection criteria for the construction of networks and installations. Features and properties of thermal insulation materials.							
	LABORATORY: Types, assortment and application of installation materials. Separable (threaded, flanged, socket and clamp separable connections) and non-separable (welded, glued, welded, clamped) connections in sanitary networks/installations. Basic types of materials and criteria for the selection of methods of renovation of water and sewage pipes. Ducts and utilities for pre-insulated heating networks. Materials used in the construction of fittings (flow control: gate valves and valves; protection: reducers, breathers; water meters) in sanitary installations/networks.							
Prerequisites and co-requisites	Knowledge of Chemistry (SSPK14), Physics (SSPK13) as well as Mechanics and Strength of Materials (SSPK09)							
Assessment methods and criteria	Subject passing criteria Final exam and passing the	Passing threshold 50.0%	Percentage of the final grade 100.0%					
Recommended reading	Basic literature	I 1. Hyla J.: Tworzywa sztuczne. Własności przetwórstwo zastosowanie. Gliwice: Wydawnictwo Politechniki Śląskiej 2000.						
	2. Krzemień E.: Materiałoznawstwo. Gliwice: Wydawnictwo Polite Śląskiej 2001.							
	3. Rudnik S.: Metaloznawstwo. Warszawa: PWN 1996.							
	Supplementary literature	I ne supplementary reading list includes scientific and technical journals (Instal, Gaz Woda Technika, Instal Reporter or Przegląd Komunalny) and Catalogue Cards of industry companies

		Materiałoznawstwo Instalacyjne - Nowy - Nowy - Moodle ID: 15279 https://enauczanie.pg.edu.pl/moodle/course/view.php?id=15279		
Example issues/ example questions/ tasks being completed	Knowledge of the basic characteristics and properties of installation materials. Making the right choice of materials and conduit connection techniques for the construction of sanitary networks and installations. Basic types of materials and criteria for the selection of methods of renovation of "WOD-KAN-GAS" pipes			
Work placement	Not applicable
