

Subject card

Subject name and code	Digital embedded and programmable systems, PG_00059226						
Field of study	Automation, Robotics and Control Systems						
Date of commencement of studies	February 2022	Academic year of realisation of subject			2022/2023		
Education level	second-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Controlled Electric Drives -> Faculty of Electrical and Control Engineering						
Name and surname of lecturer (lecturers)	Subject supervisor	dr hab. inż. Arkadiusz Lewicki					
	Teachers	dr inż. Filip Wilczyński dr hab. inż. Arkadiusz Lewicki					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	0.0	15.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study	SUM	
	Number of study hours	30	5.0		15.0	50	
Subject objectives	Presentation of programmable logic structures, presentation of programming methods and methods to control of peripheral devices						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K7_K02	Student is able to work in a group taking different roles in it			[SK2] Assessment of progress of work		
	K7_U11	Student is able to design and implement simple process control systems using computer systems			[SU4] Assessment of ability to use methods and tools		
	K7_U05	Student is able to select equipment and make electrical measurements, can use information and communication techniques to carry out engineering tasks related to programmable logic devices.			[SU1] Assessment of task fulfilment		
	K7_W03	Student is able to analyze documentation and on their basis develop digital structure with given parameters.			[SW3] Assessment of knowledge contained in written work and projects		
Subject contents	The structures of programmable devices: PLD (SPLD, CPLD) and FPGA. Programming methods, methods of logical structure design. Preparing of complex functional blocks. Basics of HDL languages. Cooperation with external digital devices.						
Prerequisites and co-requisites	Knowledge in the field of digital technology.						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	The projects designed during laboratory exercises	60.0%			80.0%		
	Examination of the lecture	60.0%			20.0%		
Recommended reading	Basic literature	<ol style="list-style-type: none"> Robert Betz: Hardware Description Languages. Ducek: Digital Design with CPLD Application and VHDL. Uwe Meyer-Baese: Digital signal processing with Field Programmable Gate Array. K. Parnell, N.Metha: Programmable Logic Design. S.Shjiva: Introduction to logic design. P. Chu: RTL hardware design using VHDL. 					
	Supplementary literature	No special recommendations					
	eResources addresses						

Example issues/ example questions/ tasks being completed	1. Describe the structure of the FPGA. 2. Describe the structure of logic macrocell. 3. Design the logical structure to control of selected device.
Work placement	Not applicable
