

Subject card

Subject name and code	CYBERSECURITY MANAGEMENT, PG_00056590						
Field of study	Engineering Management						
Date of commencement of studies	October 2020		Academic year of realisation of subject		2023/2024		
Education level	first-cycle studies		Subject group		Optional subject group Subject group related to scientific research in the field of study		
Mode of study	Full-time studies		Mode of delivery		at the university		
Year of study	4		Language of instruction		English		
Semester of study	7		ECTS credits		3.0		
Learning profile	general academic profile		Assessment form		assessment		
Conducting unit	Department of Informatics in Management -> Faculty of Management and Economics						
Name and surname of lecturer (lecturers)	Subject supervisor		dr hab. inż. Rafał Leszczyna				
	Teachers		dr hab. inż. Rafał Leszczyna				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	0.0	15.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		0.0	30
Subject objectives	For a student to acquire the fundamental knowledge on cybersecurity management in organisations.						
Learning outcomes	Course outcome		Subject outcome		Method of verification		
	[K6_W13] has a basic knowledge of the design, modelling and optimisation of technical processes and systems		Student: - describes an enterprise, - identifies and describes cyberassets, - recognizes and describes cybersecurity problems in enterprises, - defines protection measures.		[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
	[K6_U08] analyses engineering and managerial solutions in decision-making processes, taking into account pro-quality and pro-environmental aspects, as well as safety of work processes		Student: - analyses an enterprise and its cyberassets, - analyses cybersecurity threats, - selects protection measures.		[SU1] Assessment of task fulfilment [SU2] Assessment of ability to analyse information		
Subject contents	<ul style="list-style-type: none">• Basic concepts, fundamentals of cybersecurity• Usable cybersecurity• Cybersecurity management process• Cybersecurity risk management• Cybersecurity threats• Selected cybersecurity standards and guidelines• Protection controls						
Prerequisites and co-requisites	Communicative English						
Assessment methods and criteria	Subject passing criteria		Passing threshold		Percentage of the final grade		
	knowledge examination		60.0%		45.0%		
	lab exercises		60.0%		50.0%		
	active participation in the course meetings		60.0%		5.0%

Example issues/ example questions/ tasks being completed	<ol style="list-style-type: none"> 1. Analyse an enterprise. Identify and describe its cyberassets. 2. Identify independent lists of cybersecurity threats and develop your proprietary list of cyberthreats. 3. Calculate cybersecurity risks. 4. Explain a systematic approach of cybersecurity management in an enterprise. 5. Choose a cybersecurity standard, justify the choice. 6. Provide an example of violating the integrity of a cyberasset. 7. Provide an example of a security control to reduce the risk of copying accounting data by unauthorised users. 8. Provide and explain the cybersecurity risk formula. 9. Enlist and explain the most common cybersecurity risk treatment strategies. 10. Describe principal characteristics of access control. 	
Work placement	Not applicable
