

Subject card

Subject name and code	, PG_00059286						
Field of study	Design and Construction of Yachts						
Date of commencement of studies	October 2021	Academic year of realisation of subject			2022/2023		
Education level	first-cycle studies	Subject group					
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	2	Language of instruction			Polish		
Semester of study	4	ECTS credits			5.0		
Learning profile	practical profile	Assessment form			assessment		
Conducting unit	Institute of Ocean Engineering and Ship Technology -> Faculty of Mechanical Engineering and Ship Technology						
Name and surname of lecturer (lecturers)	Subject supervisor		mgr inż. Jacek Frost				
	Teachers		mgr inż. Jacek Frost				
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	0.0	30.0	0.0	0.0	0.0	30
E-learning hours included: 0.0							
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan		Participation in consultation hours		Self-study	SUM
	Number of study hours	30		0.0		95.0	125
Subject objectives	The aim of the course is to familiarize students with the functioning of the enterprise. Getting to know the structure of the company. Getting to know the production process of watercrafts. Participation in all stages of yacht construction.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	K6_K01	The student is aware of the continuous development in the field of the profession, knows the paths of development			[SK3] Assessment of ability to organize work [SK1] Assessment of group work skills		
	K6_U04	has the ability to self-study in order to develop their professional qualifications, is prepared to work in an industrial environment, applies the principles of occupational health and safety			[SU3] Assessment of ability to use knowledge gained from the subject [SU4] Assessment of ability to use methods and tools		
	K6_U06	is able to perform a simple engineering task in the field of designing, manufacturing and operating yachts in accordance with the formulated specification, using appropriate methods and tools			[SU4] Assessment of ability to use methods and tools [SU5] Assessment of ability to present the results of task		
	K6_K03	understands the non-technical aspects and effects of activity in the engineering profession, its impact on the environment and is aware of the responsibility for decisions made			[SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice		
Subject contents	Implementation of the internship in an enterprise in the amount of 120 hours, settlement of the internship, preparation of a report.						
Prerequisites and co-requisites	Completed 1 year of studies						
Assessment methods and criteria	Subject passing criteria	Passing threshold			Percentage of the final grade		
	Practice implementation report	60.0%			100.0%		
Recommended reading	Basic literature		not applicable				
	Supplementary literature		not applicable				
	eResources addresses						

Example issues/ example questions/ tasks being completed	not applicable
Work placement	Not applicable
