

## Subject card

Subject name and code	Modern Technologies in Construction, PG_00057082						
Field of study	Architecture						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			English		
Semester of study	1	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			assessment		
Conducting unit	Department of Technical Fundamentals of Architecture Design -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	dr inż. arch. Joanna Kabrońska					
	Teachers	dr inż. arch. Joanna Kabrońska					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	15.0	15.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	4.0		16.0		50
Subject objectives	Acquiring the ability to apply innovative technologies in the design of the built environment						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_W01] knows and understands construction, building and engineering issues related to building design; principles, solutions, constructions and building materials used in performing complex engineering tasks in the field of architectural and urban design	Student knows innovative building materials and technologies and has knowledge about their application in architectural design process			[SW2] Assessment of knowledge contained in presentation		
	[K7_W02] knows and understands the rules of gathering information and their interpretation as a part of project concept preparation; detailed issues related to architecture and urban planning in the field of complex design problems solving	The student knows and understands the rules of searching and selecting information about emerging technologies and innovative building materials during the development of the design concept			[SW1] Assessment of factual knowledge [SW3] Assessment of knowledge contained in written work and projects		
Subject contents	New technologies in architecture: introduction, concept and role of technology. Social aspects of technological change: Actor-Network Theory  Innovative materials and technologies and their applications  Smartmaterials: nanomaterials, phase-change materials, high-performance materials  Building materials and technologies in an environmental aspect. Energy neutral architecture  Intelligent components and systems in architecture, intelligent environments. Scenarios for the future						

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	completion of the tasks	100.0%	100.0%
