|   | Number of study hours  | 60  | 10.0                                |            | 55.0   | 125     |     |
| Subject objectives                          | The aim of the module is to acquire learning outcomes from the following components:<br><br>- Studies and plans of spatial management<br><br>- Basis for local government and theory of spatial planning   |   |                                     |            |  |         |     |
| Learning outcomes                           | Course outcome   | Subject outcome   |                                     |            | Method of verification   |         |     |
|   | [K7_U03] is able to prepare advanced graphic, written and oral presentation of own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design | is able to prepare a graphic, written and oral presentation of your own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design |                                     |            | [SU5] Assessment of ability to present the results of task   |         |     |
|   | [K7_U01] is able to use the experience gained during studies to make a critical analysis of the conditions and formulate conclusions for design in a complicated, interdisciplinary context  | is able to use the experience gained during studies to critically analyze the conditions and formulate conclusions for design in an interdisciplinary context   |                                     |            | [SU4] Assessment of ability to use methods and tools   |         |     |
|   | [K7_K01] is ready to undertake and perform work in a professional manner, including compliance with the principles of professional ethics and taking responsibility for the taken actions  | is ready to undertake and perform work in a professional manner, including compliance with the principles of professional ethics and taking responsibility for the taken actions  |                                     |            | [SK5] Assessment of ability to solve problems that arise in practice   |         |     |

| Subject contents   | <p><b>Studies and plans of spatial management - lectures:</b></p> <p>Development of basic and genesis of current spatial planning tools. Legal and organizational structure of process of shaping the development and spatial management types of spatial policy tools and types of the control actions in space. Basics of strategic and operational planning development strategies and local development plans. Characteristic of basic types of studies and local management plans (voivodship, metropolitan area, town and rural commune and their parts) objective, tasks, complexity, detail, mandatory execution, legal rank, relations with other tools of realization of a change in space and the impact of changes. Characteristic of the other tools of realization of a change in space and the impact of changes relations with basic the studies and local management plans. Forms and range of text planning documents formal and legal requirements (statutory regulation and ordinance). Sources of information about space and converting tools SIP, GIS, GUS, ESPON. Specialized studies for studies of the conditions and directions of the spatial management and local management plans: analysis of the state and the process of land use. Demographic, social and geographical analysis and forecasts. Nature, landscape and cultural analysis and forecasts. Transport and infrastructure analysis and forecasts.</p> <p><b>Design:</b></p> <p>Prepare drawing of local spatial management plan, including issuing areas of different purpose and different principles of development. Establish directions of the spatial management at the local plan area basing on study of the conditions and directions of the spatial management of a commune. Prepare card site for chosen area in the framework of local management plan. Presentation and discussion about the project. Prepare architectural concept of housing complex or service and housing complex basing on the plan.</p> <p><b>Exercise:</b></p> <p>Presentations detailed planning and building issues based on planning and construction law. Discussion of presented issues. Translation from legal language into construction and architectural language.</p> |                               |  |                          |                   |                               |  |        |       |   |        |       |   |       |       |  |       |       |
