Subject objectives	The aim of the course is to collect materials, prepare historical, architectural and urban analyzes, conservation study in a selected problem area. The aim of the project is to create guidelines for the design and design a new architectural object with a new function and form closely related to the selected historical architectural and urban context.						
Learning outcomes	Course outcome	Subject outcome			Method of verification		
	[K7_U01] is able to use the experience gained during studies to make a critical analysis of the conditions and formulate conclusions for design in a complicated, interdisciplinary context	is able to use the experience gained during studies to make a critical analysis of the conditions and formulate conclusions for design in a complicated, interdisciplinary context			[SU1] Assessment of task fulfilment		
	[K7_U02] is able to use interdisciplinary knowledge and skills acquired during studies to design a complex architectural object or urban complex that meets the aesthetic and technical requirements, creating and transforming space and giving it new values	is able to use interdisciplinary knowledge and skills acquired during studies to design a complex architectural object or urban complex that meets the aesthetic and technical requirements, creating and transforming space and giving it new values			[SU3] Assessment of ability to use knowledge gained from the subject		
	[K7_U03] is able to prepare advanced graphic, written and oral presentation of own design in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design	Assessment of task fulfilment [K7_U03] is able to prepare advanced graphic, written and oral presentation of own design concepts in the field of architecture and urban planning, meeting the requirements of a professional record appropriate for architectural and urban design			[SU5] Assessment of ability to present the results of task		

Subject contents	<p>- Introduction to the subject of design in a historical environment</p> <p>- Selection of the task - design area, definition of the problem and the purpose of the architectural intervention - Collection of archival materials- Recognition of the local cultural landscape and urban context- Historical and conservation study, urban and architectural analyzes- Setting of the functional and formal guidelines, project concept- Development of initial design concepts- elaboration of the urban and architectural design</p>
