

Subject card

Subject name and code	Introduction to Local Governance and Theory of Spatial Planning, PG_00053395						
Field of study	Architecture						
Date of commencement of studies	October 2023	Academic year of realisation of subject			2023/2024		
Education level	second-cycle studies	Subject group			Obligatory subject group in the field of study Subject group related to scientific research in the field of study		
Mode of study	Full-time studies	Mode of delivery			at the university		
Year of study	1	Language of instruction			Polish		
Semester of study	2	ECTS credits			2.0		
Learning profile	general academic profile	Assessment form			exam		
Conducting unit	Department of Urban Design and Regional Planning -> Faculty of Architecture						
Name and surname of lecturer (lecturers)	Subject supervisor	mgr Michał Habier					
	Teachers	Kamil Olzacki dr hab. inż. arch. Izabela Mironowicz dr hab. inż. arch. Jacek Sołtys					
Lesson types and methods of instruction	Lesson type	Lecture	Tutorial	Laboratory	Project	Seminar	SUM
	Number of study hours	30.0	0.0	0.0	0.0	0.0	30
	E-learning hours included: 0.0						
Learning activity and number of study hours	Learning activity	Participation in didactic classes included in study plan	Participation in consultation hours		Self-study		SUM
	Number of study hours	30	2.0		18.0		50
Subject objectives	The aim of the course is to acquire knowledge of the basics of territorial self-government, legal aspects of the construction investment process and the basics of spatial development and planning theory.						

Learning outcomes	Course outcome	Subject outcome	Method of verification
	[K7_W03] knows and understands the history and theory of architecture as well as art, technology and humanities to the extent necessary for the proper performance of architectural designs; advanced issues related to architecture and urban planning useful for designing architectural objects and urban complexes in the social, cultural, natural, historical, economic, legal context and other non-technical conditions of engineering activities, integrating knowledge acquired during studies	The student has knowledge of the tools and institutions of broadly understood urban planning used in the profession of an architect.	[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation
	[K7_K01] is ready to undertake and perform work in a professional manner, including compliance with the principles of professional ethics and taking responsibility for the taken actions	The student has knowledge of the liability in the performance of the profession of an architect in terms of disciplinary, administrative, civil and criminal law.	[SK4] Assessment of communication skills, including language correctness [SK5] Assessment of ability to solve problems that arise in practice
	[K7_W05] knows and understands issues related to architecture and urban planning in the context of the multi-discipline nature of architectural and urban design as well as the need to cooperate with other specialists; legal provisions and procedures necessary for the implementation of building designs and the integration of buildings with the overall planning project	The student has knowledge of the organization and functioning of space management at the planning stage and at all stages of the investment and construction process.	[SW1] Assessment of factual knowledge [SW2] Assessment of knowledge contained in presentation
Subject contents	<p>Territorial self-government the essence, development in Europe and Poland, the role in spatial management. Regional and local self-government units in Poland, their authorities. Finance of the territorial self-government. Contemporary problems of territorial self-government in Poland.</p> <p>Social participation in spatial management.</p> <p>Construction investment implementation process.</p> <p>Planning and plans their role in management, steering and politics. Types of plans and planning. Subjects and factors shaping space. Instruments of spatial policy. Aspects of space.</p> <p>Regions concept and types. The structure of the region's space. Regional development.</p> <p>Basic theories of spatial economy, contemporary processes (concentration, polarization, urbanization, metropolization).</p> <p>Information about space - sources, processing</p> <p>Spatial planning methods: general procedure, diagnosis (including space valorization, including threshold analysis; forecasting, including scenario method; solution design, including the use of models, scenarios, variants)</p> <p>Strategic planning - concept, features, methods. Integrated planning (strategy + study)</p> <p>Programming of revitalization</p> <p>Supra-communal planning problems - places to solve them; MOF (urban functional areas), ZIT (Integrated Territorial Investments).</p> <p>Selected research problems related to planning and spatial development</p>		

Prerequisites and co-requisites			
Assessment methods and criteria	Subject passing criteria	Passing threshold	Percentage of the final grade
	Presence at lectures	0.0%	0.0%
	Activity at lectures (tests / quizzes)	0.0%	20.0%
	Colloquium (test)	51.0%	80.0%
